BEACON STATION 546, 29705 MISSION BOULEVARD, HAYWARD,  
CALIFORNIA**

Dear Mr. Sommer:

Enclosed are two signed copies of your Right-Of-Entry Addendum. Please initial the crossed-out section on the two Addendum and return a copy with two signatures to Ultramar for filing.

If you have a problem with the condition of the former Beacon station property, please feel free to call our Customer Satisfaction Center at 1-800-448-1215 (business card attached). This Center prides itself in handling all inquiries, compliments, and complaints in a timely manner (greater than 95% of complaints are solved within 24-hours!).

Please call the Center and give your specific complaint. After you see results, you will probably feel comfortable in signing the enclosed addendum. Please do not hesitate to call if you have any questions regarding this information.

Sincerely,

Mr. Rick Rohere  
City of Hayward  
Building Department  
22300 Foothill Boulevard  
Hayward, California 94541

Subject: Application for Encroachment Permit to install one ground-water monitoring well in the sidewalk along Industrial Parkway in Hayward, California.

Mr. Rohere:

At the request of Ultramar Inc. (formerly Beacon Oil Company), Applied GeoSystems is conducting an environmental investigation at former Beacon Station No. 546, which is at 29705 Mission Boulevard in Hayward, California. The site is located on the south corner of the intersection of Mission Boulevard and Industrial Parkway as shown on the Site Vicinity Map (Plate P-1). Pertinent site features include three onsite and three offsite ground-water monitoring wells, and are shown on the Generalized Site Plan (Plate P-2) that include three onsite and three offsite wells. The environmental investigation at the former Beacon Station is being conducted to delineate the extent and magnitude of a dissolved hydrocarbon plume. This investigation is being conducted in compliance with guidelines of the Regional Water Quality Control Board and the Hayward Fire Department. Recent work performed at the site is described in Applied GeoSystems Letter Work Plan 18008-5, dated August 20, 1989.

Results of laboratory analyses of water samples collected from wells MW-1 through MW-6 indicate that there are concentrations of dissolved hydrocarbons in the ground water downgradient of the site. The extent and magnitude of the dissolved hydrocarbon plume has yet to be delineated.

We request your permission to install a ground-water monitoring well (well MW-7 on Plate P-2) along the sidewalk of Industrial Parkway to provide information on the western extent of the plume.

The proposed well is to be constructed in a soil borehole in a manner similar to that shown on Plate P-3. The soil boring will be drilled with 10-inch-diameter, continuous-flight, hollow-stem augers using a Mobile B-61 (or similar) truck-mounted drill rig. The auger

flights will be steam-cleaned prior to use to minimize the possibility of cross-contamination. Drilling will be performed under the guidance of a field geologist, and the earth materials in the boring will be logged as drilled in accordance with the Unified Soil Classification System. Drilling will be stopped if any saturated clay layer (aquitar) greater than 5 feet thick is encountered below the ground-water surface. During drilling, soil samples will be collected at 5-foot intervals using a California-modified, split-spoon sampler (2.5-inch inside diameter) equipped with clean brass sleeves.

We propose to construct a ground-water monitoring well in the borehole with flush threaded, 4-inch-inside-diameter, Schedule 40 PVC casing. No chemical cements, glues, or solvents will be used in well construction. The screened portion of the well will consist of factory-perforated casing with 0.020-inch-wide slots. Approximately 15 feet of well screen will be placed below the measured ground-water surface and a minimum of 5 feet of screen will extend above the ground-water surface to allow monitoring throughout the year despite expected seasonal fluctuations of ground water. The annulus of the well will be packed with sorted sand to approximately 2 feet above the screened interval. A 1- to 2-foot-thick bentonite plug will be placed above the sand as a seal against cement entering the well screen. The remaining annulus will be backfilled with a slurry of water, neat cement, and 5 percent bentonite to a few inches below grade.

A locking well cap and padlock will be installed on the wellhead, and a traffic-rated, cast-aluminum utility box with a PVC apron will be placed over the well and set with concrete flush with the surrounding ground surface. The box has a watertight seal to protect against surface-water infiltration and requires a specially designed wrench to open. This design discourages vandalism and reduces the possibility of accidental disturbance of the well.

Soil cuttings produced by drilling activities will be quickly moved to, and temporarily stored at, the former Beacon Station pending results of analyses of soil samples collected during borehole drilling. The cuttings will be disposed of properly at the request of Ultramar Inc.

Applied GeoSystems personnel will acquire a permit from the Alameda County Flood and Water Conservation District before drilling begins. Applied GeoSystems also will contact Underground Service Alert to delineate public utility lines before drilling begins. The borehole will be hand-augered to a minimum depth of 5 feet, as an added safety measure, to help avoid drilling into man-made objects. We would like to begin drilling on December 8, 1989, and the drilling work should last no more than one day.

Depending upon the finding of this phase of the investigation, the well may require monitoring until such time as ground water in the vicinity of the site until such time as beneficial use of ground water in the vicinity if the site is no longer unreasonably affected by hydrocarbons. Monitoring may last for a period of 1 to 2 years. After the well is no

Application for Encroachment Permit  
Beacon Station, 29705 Mission Blvd., Hayward, Calif.

November 22, 1989  
AGS 18008-4

longer needed, it will be destroyed properly by drilling it out with 12-inch-diameter augers and backfilling the borehole with neat cement to within a few inches of the ground surface. The ground surface then will be restored to resemble the surrounding material.

Attached is a copy of our Certificate of Insurance and the \$50.00 fee for the Encroachment Permit application. We trust this letter meets with your requirements.

Please call if you have questions regarding the contents of this letter or the investigation in general.

Sincerely,  
Applied GeoSystems

Leigh Beem  
Project Geologist

FROM: HUGH MURPHY, HAZARDOUS MATERIALS INVESTIGATOR

Business Name: Beacon Oil

Address: 29705 Mission Blvd.

Name of Contact At Business: Steven Epperson, Beacon Oil (209) 583-3372  
~~Tim O'Brien~~, Applied Geo Systems (Beacon Consultant) 651-1906  
Bill Howell

Responsibility of Contact:

Involvement of Contact:

Additional Contacts: Adjoining Property Owner - Ralph Sommers 538-0300  
R.W.Q.C.B. Contact - Lisa McCann 464-1255

Reason for Referral: Soil and groundwater contamination - To facilitate Beacon oils cleanup and monitoring operations with the Regional Water Quality Control Board (RWQCB) requirements.

Background: On October 26, 1987 a precision tank test was done on this property. All tanks tested tight except a regular fuel tank. Beacon proposed to eliminate this tank while re-plumbing the regular dispenser to another regular tank and begin to monitor the remaining tanks. Upon re-evaluation, a decision by Beacon was made to remove all tanks and to sell the property.

All tanks were then removed. There were visible holes in two tanks, a gasoline and a waste oil. The highest level of soil contamination was noted at 2750 ppm. This level requires soil cleanup and monitoring well installation. Soil was removed and is in the process of being aerated. Several wells were drilled on the property. Groundwater contamination was detected.

Additional wells are required to be installed to delineate lateral extent of contamination. Applied Geosystems has submitted a proposal for additional wells. The wells will be installed on adjoining property owned by Mr. Sommers who is also the owner of "Holiday Bowl." Mr. Sommers is quite concerned about the contamination and has contacted us on several occasions.

Upon review of the August 25, 1988 Applied Geosystem proposal, the RWQCB and myself have given permission to proceed. Drilling is to begin next week.

HUGH MURPHY

ANNUAL FEE : \$ 700.00 BUSINESS: BEACON OIL CO, STATION #546  
RANGE: 5A ADDRESS: 29705 MISSION BLVD

THE ANNUAL FEE FOR YOUR HAZARDOUS MATERIALS STORAGE PERMIT IS DUE. THIS FEE IS VALID FROM JULY 1, 1988 THROUGH JUNE 30, 1989. PLEASE COMPLETE THE TOP SECTION OF THE ENCLOSED PERMIT APPLICATION AND RETURN THE ENTIRE FORM WITH A CHECK FOR THE FEE AMOUNT INDICATED ABOVE WITHIN 30 DAYS TO THE CITY OF HAYWARD, REVENUE DIVISION, ROOM 733, ATTN: N. CHIANESE, 22300 FOOTHILL BLVD., HAYWARD, CA 94541.

THE PERMIT FEES ARE ESTABLISHED BY THE HAYWARD FIRE DEPARTMENT IN ACCORDANCE WITH THE HAZARDOUS MATERIALS ORDINANCE [84-029], AND ARE BASED ON THE QUANTITY AND VARIETY OF STORED MATERIALS ON YOUR PREMISES AS DETERMINED BY PREVIOUS INSPECTION OR BY INFORMATION YOU HAVE PROVIDED. A FEE SCHEDULE IS ATTACHED FOR YOUR INFORMATION.

SHOULD YOU FAIL TO PAY YOUR PERMIT FEES, YOU WILL BE OPERATING YOUR BUSINESS WITHOUT A CURRENT PERMIT, IN VIOLATION OF SECTION 3-8.34 OF THE HAYWARD MUNICIPAL CODE AND SUBJECT TO LEGAL ENFORCEMENT ACTION.

TO MEET THESE REQUIREMENTS, PLEASE:

- \* SUBMIT YOUR CHECK FOR THE FEE INDICATED.
- \* SUBMIT PERMIT APPLICATION WITH TOP SECTION COMPLETED.

IF ADDITIONAL INFORMATION IS DESIRED, TELEPHONE THE HAZARDOUS MATERIALS UNIT AT 784-8695. THANK YOU FOR YOUR TIMELY RESPONSE.

## HAZARDOUS MATERIALS PERMIT

### FEE SCHEDULE

The following is the fee schedule for businesses that store or use hazardous materials in the City of Hayward. It is based on the maximum combined quantity of hazardous materials that can be at the facility at any one time and the variety of hazardous materials stored:

<u>Quantity Range*</u>	<u>Description</u>	<u>Fee Amount Per Year</u>
Range 1A	Storage of one or more hazardous materials	\$ 110
Range 2A	Storage of one or more hazardous materials	\$ 220
Range 3A	Storage of one to five hazardous materials	\$ 330
Range 3B	Storage of more than five hazardous materials	\$ 400
Range 4A	Storage of one to five hazardous materials	\$ 500
Range 4B	Storage of more than five hazardous materials	\$ 600
Range 5A	Storage of one to five hazardous materials	\$ 700
Range 5B	Storage of six to ten hazardous materials	\$ 800
Range 5C	Storage of more than ten hazardous materials	\$1000

\*Quantity Range is defined as follows:

<u>Quantity Range</u>	<u>Solid (Pounds)</u>	<u>Liquid (Gallons)</u>	<u>Gas (Cu. Ft. STP)</u>
Range 1A	Up to 500	Up to 55	Up to 200
Range 2A	500 - 5,000	55 - 550	200 - 2,000
Range 3A, B	5,000 - 25,000	550 - 2,750	2,000 - 10,000
Range 4A, B	25,000 - 50,000	2,750 - 5,000	10,000 - 20,000
Range 5A, B, C	More than 50,000	More than 5,000	More than 20,000
