SEMI-ANNUAL GROUND-WATER MONITORING REPORT FOR THE PERIOD FROM JANUARY 1 THROUGH JUNE 30, 1993

KAISER MOSSWOOD BUILDING

3505 BROADWAY, OAKLAND, CALIFORNIA

1.0 INTRODUCTION

This report presents the results of ground-water monitoring by Levine Fricke from January 1 through June 30, 1993 ("the reporting period"), on behalf of Kaiser Foundation Health Plan, Inc. ("Kaiser"), at the Kaiser Mosswood Building, 3505 Broadway, Oakland, California ("the Site"; Figure 1).

Ground water has been monitored at the Site in response to the detection of petroleum hydrocarbons in soil and ground-water samples previously collected in the vicinity of two former underground storage tanks (USTs) at the site. The monitoring has been conducted in accordance with a Levine-Fricke work plan submitted to the Department of Environmental Health at the Alameda County Health Care Services Agency (ACHCS) in January 1992 (Levine-Fricke 1992a) and as amended in the Quarterly Ground-Water Monitoring Report (Levine-Fricke, 1993). The source of the petroleum hydrocarbons detected in soil and ground water has been traced to a release from the fuel UST system formerly located at the Site.

In June 1992, the two fuel USTs, a waste oil UST, and associated piping were removed from the Site. Because of access difficulties and the analytical results of soil samples collected along the piping trenches, piping located in the building was abandoned in place. This work was performed in accordance with a Levine-Fricke work plan submitted to the Department of Environmental Health at the ACHCS, in December 1991 (Levine-Fricke 1991). During the UST removal project, soil in the vicinity of the UST system was also excavated to approximately 15 feet below ground surface (bgs) and removed from the Site, and well LF-5 was abandoned. Well LF-5R was replaced in August 1992 (Levine-Fricke 1992b).

Work performed by Levine Fricke personnel during the reporting period included the following:

measuring depth to ground water in four on-site ground-water monitoring wells (LF-2, LF-3, LF-4, and LF-5R)

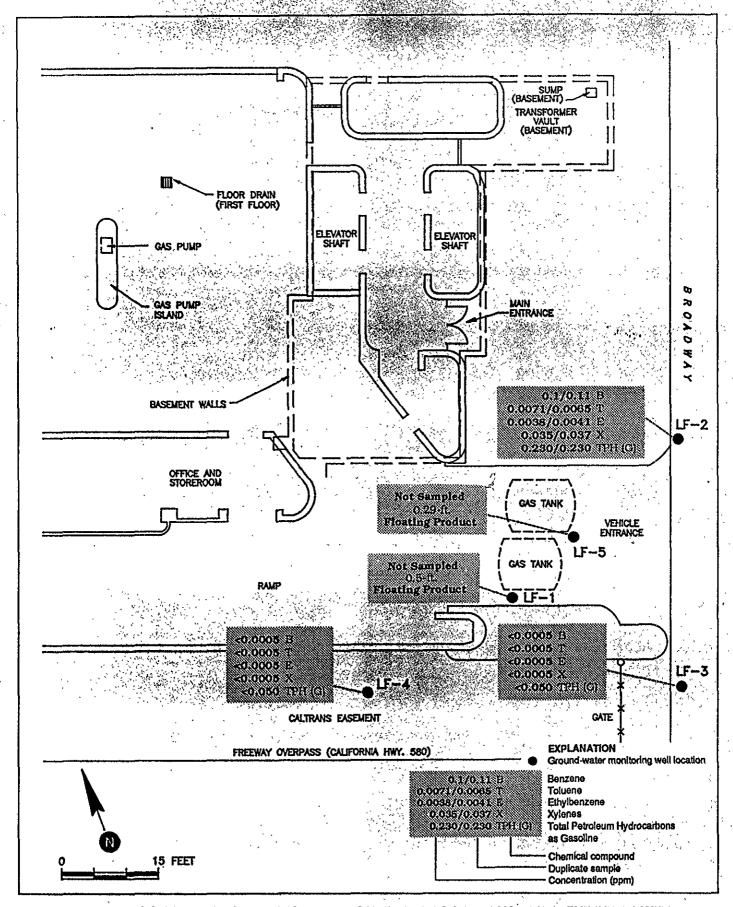

Figure 4: CONCENTRATIONS OF TOTAL PETROLEUM HYDROCARBONS (TPH), BENZENE, TOLUENE, ETHYLBENZENE, AND XYLENES (BTEX) IN GROUND WATER (MARCH 1991)
