RE: STID 3667 - Bortner & Hoyt site, located at 22117
Muckland Ave, Hayward, California

Mr. Sadoff stated that the three wells on site were surveyed in 1991 and the gradient was determined to be in the westward direction. Mr. Sadoff said that all that information is contained in a report dated May 1991. Ms. Shin stated that the Department did not have a copy of that report, so Mr. Sadoff said that he would drop off a copy.

The stockpiled soil was bioremediated and taken to BFI. Some of the soil was used as backfill. Mr. Sadoff stated that he would drop off the information regarding the removal of the soils
