

MEMORANDUM

DATE: March 26, 1992
TO : All Specialist Staff
FROM: Ariu Levi
SUBJ: BP Oil Sites

The March 24 meeting with British Petroleum has now been concluded. Mark Thomson from the District Attorney's office has now asked our office to continue the transfer of the BP Oil site mitigation cases to the LOP program. Please be advised that although individuals will be working on cases, that Brian Oliva, the lead in the BP Oil Litigation, should be forwarded/cc'd copies of all correspondence to and from BP Oil Company.

No further work is recommended based upon:

- 1) The removal of source, nearly 6200 cu yd of soil was excavated, aerated, selected for reuse;
- 2) Adequate characterization, to the extent possible;
- 3) The dissolved plume is not migrating, and
- 4) The site presents no risk to human health based upon the T2 HRA.
