May 20, 1996

RE: Pre-1995 soil pile sampling and dispensation documentation
for Case Closure: 1628 Webster Street, Alameda, California.

Dear Ms. Chu;

Please find enclosed three items concerning the Pre-1995 soil
piles that were at 1628 Webster Street, Alameda, California.

The first is page one from the June 12, 1995 proposal letter to
Mrs. Larkin for sampling of the piles. This letter summarizes
Exceltech's statements concerning the quantity of soil excavated.

The second enclosure is the September 29, 1995 letter to Mrs. and
Mr. Larkin with the sampling/analytical results for the
reconfigured soil piles.

Finally, the third enclosure comprises documentation of the
disposal of the Pre-1995 soil piles. This documentation consists
of copies of the "Account Detail By Commodity Report" and
accompanying "Weighmaster Certificates" from Altamont
Landfill/Resource Recovery, 10840 Altamont Pass Road, Livermore,
CA. Loading and transportation was performed by Allwaste
Transportation & Remediation, Inc. of San Martin, CA.

Please do not hesitate to call me at (510) 373-9211 should you
have any questions.

Sincerely,

Gary D. Lowe, R.G., C.E.G., C.H.
Principal, Hydrogeologist

RE: Soil Piles at 1628 Webster Street, Alameda, California.

Dear Mrs. Larkin;

I have been requested to sample the soil piles at your property known as 1628 Webster Street, Alameda, California. The last time we discussed this issue was in a telephone conversation on May 23, 1995 during which you indicated that Mr. Jim Munch with the State Water Board indicated that a backhoe wasn't needed for sampling. At that time you also agreed to find out how much of the soil needed to be removed from the property.

According to the May, 1990 Exceltech Summary Report: "over 3,000 cubic yards have been excavated." (last line on page with header "Summary Report, March 25, 1990, Page 8"). According to Exceltech's December, 1990 Supplementary Summary Report: "No soil has been removed from the location." (last sentence in their response to question 20 on page with header "Pacific Properties, December 13, 1990, Page 4). This is equivalent to 4,200 tons at 1.4 tons per cubic yard.

Prior to sampling a soil pile that is/was/may have been contaminated is necessary to know the criteria by which the ultimate destination of that soil will accept it.

Over the last three weeks I have been waiting for the acceptance criteria from four landfills as a potential destination for the 1628 Webster Street Soil. Acceptance criteria have been received for BFI's Vasco Road Sanitary Landfill (Vasco) in Livermore and Keller Canyon Landfill (Keller) in Pittsburg, Waste Management Inc.'s Altamont Landfill and Resource Recovery Facility (Altamont) in Livermore, and Forward Inc.'s Forward Landfill (Forward) in Stockton. Each of these landfill has been competitively priced on at least one project with which I have been involved during the last 12 months.

The acceptance criteria for the three companies are included as attachments. These criteria are required by their operating permits. All three companies require that analyses be performed that have not been performed to date. Both Vasco and Keller require that four times as many subsamples be collected as Altamont, and Forward doesn't specify what they want.

because of their costing information.
