**Subject:** Revised Drawing - Station 4977 (ACEH Case #RO0002436)  
**Attachments:** Drawing 2 - Proposed Soil Boring.pdf

Paresh,

This email serves to transmit the attached Revised Proposed Boring Drawing relevant to the Broadbent & Associates, Inc November 8, 2010 *Soil and Ground-Water Investigation Work Plan*. Per the ACEH November 18, 2010 letter, an additional boring was requested approximately 20 feet south of proposed boring B-5 for collection of soil and grab groundwater samples to address an apparent data gap. The requested boring is depicted as B-6 in the attached drawing.

It is important to note the location of Boring B-6 is on the edge of a dispenser canopy and within the sidewalk. The utility locate that will be completed prior to drilling may necessitate that we relocated boring B-6; however, we will make every effort to keep boring B-6 within the general vicinity and down gradient of historic dispenser sample DP-2.

We will await ACEH's approval to this revision prior to proceeding with work activities.

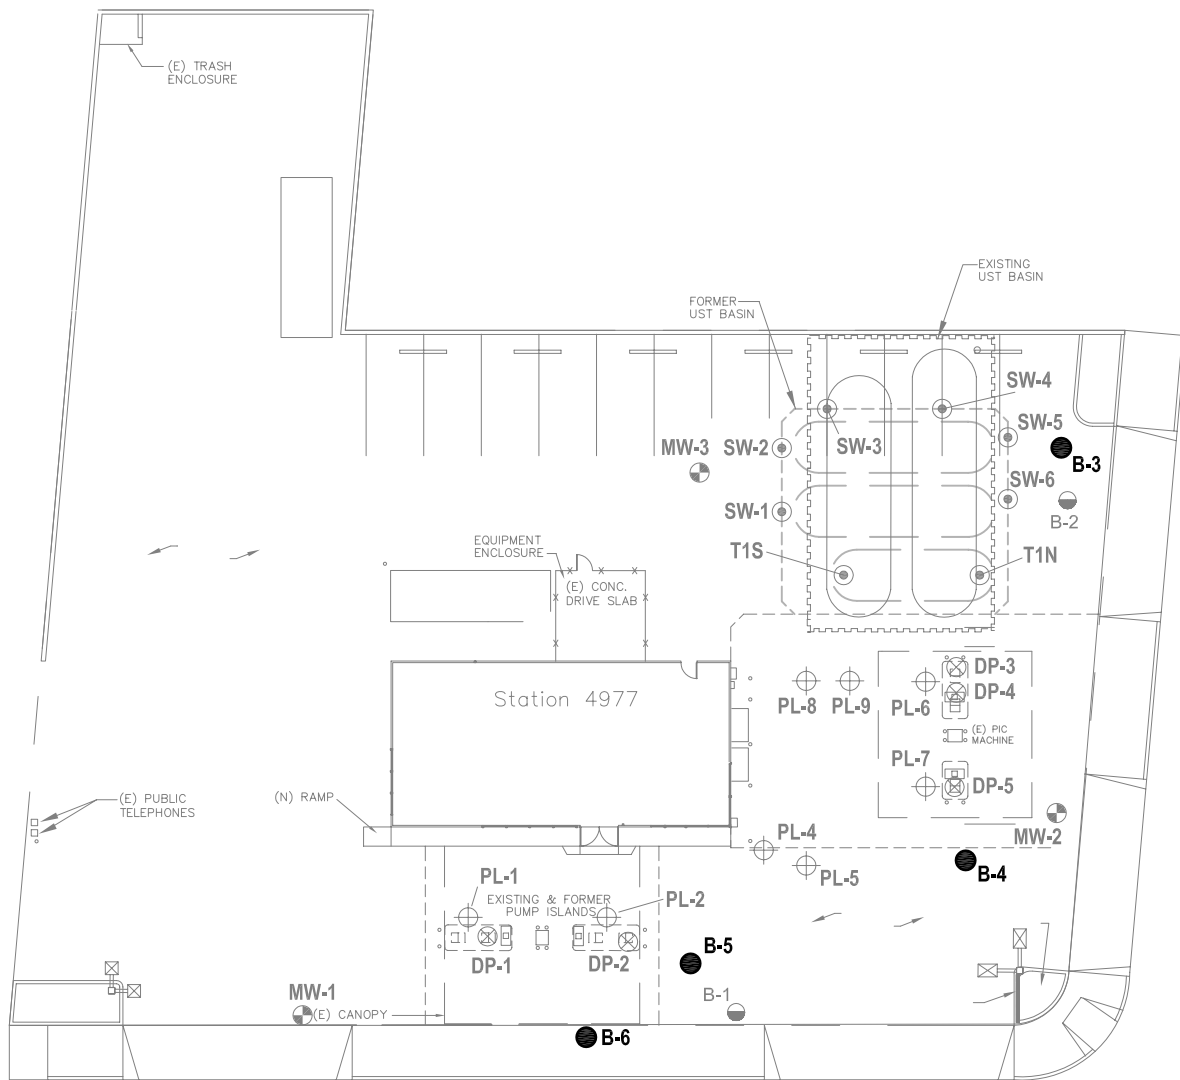

Thanks

**Matt Herrick**
