Memo to file:

After my 4/14/99 meeting w/ Cambria's Derek Ataide, he was to finalize boring locations based on our discussions that day. The w.p. was expected in a reasonably short time frame. To date, none has been submitted.

I called Mr. Ataide today, leaving a message of inquiry.

Contact Log

12/15/95 Tom Fajut, Weiss Assoc., called to say that they attempted to drill down to groundwater, but they didn't hit groundwater by 97' bgs. So they stopped drilling. They had no oclars & no PID readings and appeared to hit unconsolidated bedrock at 30' bgs.
