Peter,

You should have been uploading to the LUFT Global ID all along, not the UST Global ID. UST Global IDs are not connected with a specific contamination case. Plus, regulators cannot view any submittals uploaded to a UST Global ID. UST Global ID sometimes get reassigned to a different site (which is what has happened with your UST). The submittals you uploaded are still listed under UST Global ID 1000, only now the site is different from what it was when you initially began your uploading. You can still view all of the submittals by going to your "View Associated Facilities" and leaving the search boxes all empty and then searching for "UST". Click on "View Submittal Report" for GID 1000.

If you want, we can try to transfer all of the submittals you've uploaded to the UST over to LUFT Global ID T0600173591. Keep in mind that those that have already been "Auto Received" will retain that "Auto Received" status. Since the lead regulator would have been unable to review any of the past UST uploads, they may want to review them once they are transferred over, so you might want to discuss this with them. You would need to "claim" Global ID T0600173591 with your Contractor account and get approved by your RP client before we make the transfer

If you want the submittals transferred over from the UST to the LUFT, please request (claim) the LUFT GID and let me know after your RP has approved your request.

GeoTracker Help Desk

>>> "Thomson, Peter" <pthomson@TRCSOLUTIONS.com> 07/03/06 10:22 AM >>>  
Hi Brian,

I called and left a message about this site, but thought I would send an email to help explain. The site's Global ID is 1000, listed as a UST. We have been uploading to this site (#7124 in Oakland, on International Blvd) for several Quarters now, but when I checked the site this morning in GeoTracker, it is now showing as:

The site's address at 10151 International Boulevard in Oakland is listed on the public site as:

I'm confused about where the upload history for this site is, what happened? Do I need to request access to T0600173591 to continue to upload to this site?

Please advise, thanks!

**Subject:** RE: ConocoPhillips Site #7124

Don,

I found the site under the UST section of GeoTracker. The global ID # is 1000. I am not sure if this is the proper place to have the site listed. We would like to see the site listed under the LUFT section of GeoTracker. Can the county make the change? Thanks.

Don,

I am looking for the site located on 10151 E 14<sup>th</sup> Street (International Blvd) in the GeoTracker system. I am unable to find it and am requesting from you, if you know it, the Global ID number to the site. I have found that when a site cannot be found using the address search or city search, the global ID number search will always prevail. Your help in this matter will be greatly appreciated. Thanks.

Thomas H. Kosel, Site Manager, Risk Management and Remediation  
ConocoPhillips  
76 Broadway  
Sacramento, CA 95818

Dear Mr. Kosel,

Subject: Fuel Leak Case No. RO0002444, Unocal Service Station No. 7124,  
10151 International Boulevard, Oakland, CA

Alameda County Environmental Health (ACEH) staff has reviewed "Work Plan for Workplan for Additional Off-Site Monitoring Well Installation" dated October 14, 2004, prepared by SECOR International Incorporated. We disapprove the Work Plan. We request that you address the following technical comments and send us the technical reports requested below.

TECHNICAL COMMENTS

- 1) Groundwater Monitoring Wells - We do not agree with the proposed monitoring wells. We feel that it would be premature to install more monitoring wells without additional groundwater sampling to determine the location of the plume for optimal well locations. Please submit a Work Plan for groundwater sampling, which will determine the optimal locations for additional monitoring wells.
- 2) Preferential Pathway Survey - We request that you perform a preferential pathway study that details the potential migration pathways and potential conduits (wells, utilities, pipelines, etc.) for horizontal and vertical migration that may be present in the vicinity of the site.
  - a) Utility Survey - Please submit map(s) and cross-sections showing the location and depth of all utility lines and trenches (including sewers, storm drains, pipelines, trench backfill, etc.) within and near the site and plume area(s). Evaluate the probability of the contaminant plumes encountering preferential pathways and conduits that could spread the contamination, particularly in the vertical direction to deeper water aquifers. Please submit with the Work Plan requested below.

- b) Well Survey – Locate wells within a quarter mile radius of the site. Show the location of the wells and the site on a map and tabulate well construction details for each well. Please submit with the Work Plan requested below.
- 3) Proposed Monitoring Well Screen Length - The monitoring well screen lengths proposed are 15 feet. We request that your monitoring network be depth discrete, generally, screened intervals of 3 to 5 feet in length.
  - 4) Proposed Soil Samples from Borings – Sample at changes of lithology, at the soil/groundwater interface, and at areas of obvious contamination, at a minimum of 5 ft. intervals.
  - 5) MW-2 – Has been paved over since April 26, 2004. This groundwater monitoring well may need to be put back in service or replaced.

#### OTHER COMMENTS

- 6) Landowner Notification Requirement - Pursuant to California Health & Safety Code Section 25297.15, the active or primary responsible party for a fuel leak case must inform all current property owners of the site of cleanup actions or requests for closure. Furthermore, ACEH may not consider any cleanup proposals or requests for case closure without assurance that this notification requirement has been met. Additionally, the active or primary responsible party is required to forward to ACEH a complete mailing list of all record fee titleholders to the site.

At this time we require that you submit an updated mailing list of all record fee title owners of the site, which states, at a minimum, the following:

A. *In accordance with section 25297.15(a) of Chapter 6.7 of the Health & Safety Code, I, (name of primary responsible party), certify that the following is a complete list of current record fee title owners and their mailing addresses for the above site:*

- OR -

B. *In accordance with section 25297.15(a) of Chapter 6.7 of the Health & Safety Code, I, (name of primary responsible party), certify that I am the sole landowner for the above site.*

*(Note: Complete item A if there are multiple site landowners. If you are the sole site landowner, skip item A and complete item B.)*

In the future, for you to meet these requirements when submitting cleanup proposals or requests for case closure, ACEH requires that you:

1. Notify all current record owners of fee title to the site of any cleanup proposals or requests for case closure;
2. Submit a letter to ACEH which certifies that the notification requirement in 25297.15(a) of the Health and Safety Code has been met;
3. Forward to ACEH a copy of your complete mailing list of all record fee title holders to the site; and
4. Update your mailing list of all record fee titleholders, and repeat the process outlined above prior to submittal of any additional *Corrective Action Plan* or your *Request for Case Closure*.

Your written certification to ACEH (Item 2 above) must state, at a minimum, the following:

*A. In accordance with Section 25297.15(a) of the Health & Safety Code, I, (name of primary responsible party), certify that I have notified all responsible landowners of the enclosed proposed action. (Check space for applicable proposed action(s)):*

*cleanup proposal (Corrective Action Plan)*  
 *request for case closure*  
 *local agency intention to make a determination that no further action is required*  
 *local agency intention to issue a closure letter*

- OR -

*B. In accordance with section 25297.15(a) of Chapter 6.7 of the Health & Safety Code, I, (name of primary responsible party), certify that I am the sole landowner for the above site.*

*(Note: Complete item A if there are multiple site landowners. If you are the sole site landowner, skip item A and complete item B.)*

#### TECHNICAL REPORT REQUEST

Please submit technical reports to Alameda County Environmental Health (Attention: Don Hwang), according to the following schedule:

June 12, 2005 - Work Plan

#### OTHER REPORT REQUEST

June 12, 2005 - List of Record Fee Title Owners

These reports are being requested pursuant to California Health and Safety Code

**RE: Work Plan Approval for Tosco Station 7124 at 10151 E 14<sup>th</sup> St, Oakland, CA**

Dear Mr. DeWitt:

I have completed review of Secor's January 2002 *Work Plan for Monitoring Well Installation* prepared for the above referenced site. The proposal to install four groundwater monitoring wells at the site is acceptable. Be advised that wells must be surveyed to determine latitude and longitude coordinates and be within sub-meter accuracy. In addition, the well casing elevation must also be calculated.

If you have any questions, I can be reached at (510) 567-6762.

**COMMENTS:** I have not been able to locate an Unauthorized Release Report for the Site, but believe Hernan Gomez in Oakland may have a copy. However, he has been unresponsive to my requests. Please notify him to transfer the case over to you and send a copy of the URR; you may have better luck with him. Note that Tosco is trying to stay proactive with their sites and priority on this case would be greatly appreciated. Thank you for your patience and cooperation.
