 SAMPLE

**Gasoline Range (C6-C12) Volatile Hydrocarbons as Gasoline<sup>a</sup>, with Methyl tert-Butyl Ether<sup>a</sup> & BTEX<sup>a</sup>**  
 EPA methods 8030, modified 8015, and 8020 or 8021, California RWQCB (57 Day Region) method OCAD(5030)

Lab ID	Client ID	Matrix	TPH(g)	MTBE	Benzene	Toluene	Ethylbenzene	Xylenes	% Rec. Surrogate
68764	LW-1	W	170b	ND	ND	0.79	2.6	18	100
Reporting Limit unless otherwise stated; ND means not detected above the reporting limit			W	50 ug/l.	5.0	0.5	0.5	0.5	0.5
			S	1.0 mg/kg	0.05	0.005	0.005	0.005	

<sup>a</sup> water and vapor samples are reported in ug/L, soil and sludge samples in mg/kg, and all TCLP extracts in mg/L

<sup>b</sup> cluttered chromatogram, sample peak coelutes with surrogate peak

<sup>c</sup> The following descriptions of the TPH chromatogram are cursory in nature and McCampbell Analytical is not responsible for their interpretation: a) unmodified (or weakly modified) gasoline is significant; b) heavier gasoline range compounds are significant (aged gasoline?); c) lighter gasoline range compounds (the most mobile fraction) are significant; d) gasoline range compounds having broad chromatographic peaks are significant; biologically altered gasoline?; e) TPH pattern that does not appear to be derived from gasoline (?); f) one to a few isolated peaks present; g) strongly aged gasoline or diesel range compounds are significant; h) lighter than water immiscible sheen is present; i) liquid sample that contains greater than ~ 5 vol. % sediment; j) no recognizable pattern.

DHS Certification No. 1644
