Subject: RO2449 Cruise America analyses
Adrian and Bob,

In reviewing the proposed scope of work for soil and groundwater analyses in the document entitled, "Response to Comments - Confirmation Investigation Work Plan," dated April 23, 2008, I noted that TPH as motor oil analyses were not included for borings near the waste oil tank. Since TPH as motor oil analysis is required to define the extent of contamination for a waste oil release, I assume this was an oversight in the Work Plan. Please include TPH as motor oil analysis by EPA Method 8015 for samples collected in the area of the waste oil tank.

Regards,

Jerry Wickham
