Subject: Fuel Leak Case No. RO0002452, Berkeley Farms Truck Repair Southern Site, 4501 San Pablo Avenue, Emeryville, CA – Request for Well Decommissioning

Dear Mr. Puckett and Ms. Bellini:

Alameda County Environmental Health (ACEH) and California Regional Water Quality Control Board staff have reviewed the fuel leak case file and case closure summary for the above-referenced site and concur that no further action related to the underground storage tank fuel release is required at this time. This fuel leak case will be closed with the following site management requirement:

"Case closure for the fuel leak site is granted for commercial land use only. If a change in land use to residential or other conservative scenario occurs at this property, Alameda County Environmental Health must be notified and the case needs to be re-evaluated. These site management requirements are to be entered into the City of Emeryville's OSIRIS (One Stop Interactive Resource Information System) Map Server due to the residual contamination posing a nuisance for subsurface utility work."

Prior to issuance of a remedial action completion certificate, the monitoring well at the site is to be properly destroyed, should the monitoring well have no further use at the site. Please decommission the monitoring well and provide documentation of the well decommissioning to this office. A remedial action completion certificate will be issued following receipt of the documentation.

Well destruction permits may be obtained from the Alameda County Public Works Agency (<http://www.acgov.org/pwa/wells/index.shtml>). If you have any questions, please call me at (510) 567-6791.

Sincerely,

Jerry Wickham
Hazardous Materials Specialist

Mr. Peter Puckett
