Refinancing and bank found our July 2009 NOV letter requesting site be claimed in Geotracker, the only focus of that letter. There also is a question as to where work sits, eva chew granted "NFA" to a portion of site in late 1990's, but was concerned with chlorinated VOCs, James River maintained is from offsite, and no risk, risk assessment submitted in April 1999, remediation (?) reports in 2001, not sure where case sits, although it looks like there is a funds request letter, so we may not be able to proceed. Let her know of ACEH website, roughly how to get there online, so she or her consultants can review reports.

Thanks.
