Work Plan 0278.W1 addendum

Ms. Eva Chu
Alameda County Environmental Health Services
1131 Harbor Bay Parkway
Alameda, CA 94502-6577

SUBJECT: SUBSURFACE INVESTIGATION WORK PLAN ADDENDUM
Pacific Rolling Door
15900 Worthley Drive
San Lorenzo, CA

Dear Ms. Chu:

In accordance with your comments, the work plan 0278.W1 has been modified to show the hand augering of nine soil borings, instead of five. Furthermore, if the photoionization detector (PID) reads above 20 ppm on any soil sample, the sample will be analyzed for Volatile Organic Compounds (VOCs) by EPA Method 8260. If none of the samples have PID readings above 20 ppm, then only the shallow sample from borehole B19 will undergo VOC analysis by EPA Method 8260. A revised Site Plan showing the proposed drilling locations, designated B15 through B23, is attached to this work plan addendum as Figure 1.

Should you have any questions, please do not hesitate to contact us at (510) 547-7771.

Very Truly Yours,

RGA Environmental, Inc.
