**SUBJECT      Notification of Upcoming On-site Environmental Activities**  
Former Exxon Service Station 70234  
3450 35th Avenue, Oakland, California

Mr. Spencer:

At the request of ExxonMobil Environmental Services (EMES), on behalf of Exxon Mobil Corporation, Cardno ERI is notifying you of upcoming environmental activities at the subject site. The purpose of the work is to observe aquifer characteristics and to assess the feasibility of groundwater pump and treat as a remediation strategy for dissolved-phase petroleum hydrocarbon concentrations in groundwater underlying the site.

Field work will include setting-up equipment, performing a 24-hour pump test on well RW1 followed with a 72-hour feasibility pump test on well RW1, and disassembling the equipment. These activities are scheduled to occur from the February 13 through February 17, 2012. In addition to this notification letter, Cardno ERI notified your property manager, Ms. Tonya Chan, via phone call and electronic correspondence on January 31, 2012 and informed her of the February on-site fieldwork that Cardno ERI has scheduled.

The proposed February 2012 schedule for on-site environmental activities is outlined below.

Feasibility equipment set-up: February, 10, 2012

24-hour and 72-hour Feasibility Pump Tests at well RW1: February 13, 2012 (AM) through February 17, 2012

Groundwater produced during the pump test will be temporarily stored on site in a 6,000-gallon holding tank. The approximate location of the holding tank is illustrated on the attached Generalized Site Plan. Prior to the pump tests, Cardno ERI will have a temporary job office delivered to the subject site to provide shelter for workers during the daytime/nighttime. The approximate location of the temporary job office container (remediation trailer) is illustrated on the attached Generalized Site Plan. Cardno ERI appreciates your cooperation in ensuring that field work occurs safely and efficiently.
