

MEMORANDUM

TO: Dan Carroll **DATE:** January 9, 2003
FROM: Ravi Arulanantham & **PROJ. NO.:** 8367.001
 Elizabeth Wells **PROJ. NAME:** Fabco Automotive Corp.

SUBJECT: Results of Additional Phase II Grab Groundwater Investigation
 1249 67th Street, Emeryville, California

At your request, Geomatrix Consultants, Inc. (Geomatrix), has prepared this memorandum to present the results of the additional Phase II grab groundwater investigation conducted at the Fabco Automotive Corporation site located at 1249 67th Street in Emeryville, California (Figure 1). The work conducted includes collecting five additional grab groundwater samples for chemical analysis for volatile organic compounds (VOCs). This work was conducted in accordance with our December 5, 2002 scope of services and cost estimate.

The objective of the work was to collect additional grab groundwater samples to better define the distribution of VOCs, primarily tricholorethene (TCE), in shallow groundwater beneath the site. On your oral authorization to proceed, five borings (GMX-11 through GMX-15) were advanced on December 2, 2002. The borings were drilled to approximately 19 to 20 feet below ground surface (bgs) using direct-push technology drilling techniques. A temporary polyvinyl chloride (PVC) well casing was placed into each boring and the drive casing was retracted to allow groundwater to enter into the temporary well casing. Due to the fine-grained nature of the sediments beneath the site, infiltration of groundwater into the well casings was slow; the well casings were left in place overnight to allow sufficient water to enter for sample collection. Grab groundwater samples were collected on December 3, 2002 using new, disposable bailers. The samples were transferred to laboratory-supplied containers and delivered to the laboratory under Geomatrix chain-of-custody procedures. The samples were analyzed by STL San Francisco, of Pleasanton, California, a state-certified analytical laboratory, for VOCs using U.S. Environmental Protection Agency (EPA) Method 8260B.

Analytical results indicate the detection of several VOCs in the grab groundwater samples collected during the additional Phase II investigation. Sampling locations for both phases of sampling are shown on Figure 2. Analytical results for both phases of sampling are summarized in Table 1 and presented on Figure 3 (attached). Based on the results, TCE is present in shallow groundwater at concentrations up to 62 parts per billion (ppb) beneath the northwest corner of the property. Cis- and trans-1,2-dichloroethene also were detected in shallow grab groundwater samples from this area at concentrations up to 7.7 and 2.9 ppb, respectively.

Results of Additional Phase II Grab Groundwater Investigation

January 9, 2003

Page 2

We understand that Pulte Home Corporation would like to purchase the property for a high-density residential development. Based on the data collected to date, it appears that shallow groundwater beneath the site has been impacted by VOCs. The source and lateral extent of VOCs in groundwater is unknown. We recommend contacting the appropriate regulatory agency to discuss further action that may be warranted, if any, to implement residential development at this property.

Sample Receipt Checklist

STL San Francisco

Submission #: 2002- 12 - 0072

Checklist completed by: (initials) DSH Date: 12 / 04 /02

Courier name: STL San Francisco Client World Courier

Custody seals intact on shipping container/samples

Yes No Not Present

Chain of custody present?

Yes No

Chain of custody signed when relinquished and received?

Yes No

Chain of custody agrees with sample labels?

Yes No

Samples in proper container/bottle?

Yes No

Sample containers intact?

Yes No

Sufficient sample volume for indicated test?

Yes No

All samples received within holding time?

Yes No

Container/Temp Blank temperature in compliance ($4^{\circ}\text{C} \pm 2$)?

Temp: 4.1 $^{\circ}\text{C}$ Yes No

Water - VOA vials have zero headspace?

No VOA vials submitted Yes No

(if bubble is present, refer to approximate bubble size and itemize in comments as S (small ~O), M (medium ~ O) or L (large ~ O))

Water - pH acceptable upon receipt? Yes No

pH adjusted- Preservative used: HNO₃ HCl H₂SO₄ NaOH ZnOAc

For any item check-listed "No", provided detail of discrepancy in comment section below:

Comments:

Project Management [Routing for instruction of indicated discrepancy(ies)]
