Subject: Fuel Leak Case No. RO0002527 and Geotracker Global ID T06019700255, Vulcan Materials, 501 El Charro Road, Pleasanton, CA 94566 – Revision to Described Conditions in Transmittal Letter

Dear Mr. Ferrell:

A case closure letter and remedial action completion certificate was issued by Alameda County Environmental Health (ACEH) on May 18, 2007 for the above referenced site. The transmittal letter for the underground storage tank (UST) remedial action completion certificate and case closure summary contained a typographical error in the paragraph that described site conditions. The transmittal letter contained the statement, "Residual total petroleum hydrocarbons as diesel remain in groundwater at concentrations up to 140 ppm." This statement should have read, "Residual total petroleum hydrocarbons as diesel remain in groundwater at concentrations up to 140 *parts per billion (ppb)*." We apologize for any inconvenience this typographical error may have caused.

If you have any questions, please call me at (510) 567-6791.

Sincerely,

Jerry Wickham  
Hazardous Materials Specialist
