I've updated Geotracker to reflect the revised submittal date. You can use this email to document the extension, if needed.

Mark,
October 9th would work as the 2SA2015 GMR revised submittal date.

Thank you for your flexibility,

Justin Sobieraj, PG | Senior Geologist | justin.sobieraj@arcadis-us.com

Justin,

It seems entirely reasonable to postpone the sampling so that a coordinated event will occur. Thanks for letting us know about the delay. It would also appear that we should extend the submittal date for the groundwater monitoring event on Geotracker. Would a two month delay work (say October 9th for some flexibility)?

Let me know.

Mark Detterman and Dilan Roe,

I have been in contact with the Site B consultant (EKI) for the City of Emeryville regarding their upcoming groundwater sampling schedule. Due to planned site investigation activities (including well installation), they will not resume sampling until late July (target is currently the week of July 20th). In an effort to coordinate our events, do you have any objections to the 1520 Powell Street, Emeryville, CA groundwater sampling event being postponed until EKI samples in July?

Thank you,
