Re: Well Survey Results
Unocal Service Station 5487
28250 Hesperian Boulevard at Catalpa Way
Hayward, California

Dear Ms. Berry:

Pacific Environmental Group Inc., (PACIFIC) is pleased to present the results of a water supply well survey performed for the site referenced above. The well survey was performed on behalf of Unocal Corporation in accordance with the scope of work presented in PACIFIC's *Well Survey Proposal*, dated March 21, 1996. The findings of the survey are presented below.

PACIFIC performed the water supply well survey by reviewing available files of the California Department of Water Resources to identify documented active and inactive water supply wells within a 1/4-mile radius of the subject site. The identification of monitoring wells and extraction wells associated with groundwater remediation activities was not included in the file review. One documented well was identified within the area examined (Figure 1, Table 1). The well appears to be located approximately 1,000 feet northwest of the site.

Should you have any questions regarding the results of PACIFIC's survey, please call.

Sincerely,

Pacific Environmental Group, Inc.

Joseph Muzzio
Project Geologist
C.E.G. 1672
