Jeremy,

A work plan is not required provided that the well is replaced. Please provide a letter report that documents the well replacement.

Regards,
Jerry Wickham
Alameda County Environmental Health

Jerry

As you are aware, the remediation for the subject site has been on hold for quite some time pending construction commencement. I wanted to let you know that we anticipate moving forward with the work in the next couple of months. Part of the construction activities involve extending the western wall of the current building over well AMW-6. Therefore, AEI plans to destroy well AMW-6 and re-install the well approximately 15 feet to the west (see attached site plan). Do we need to put together any sort of work plan for this? Or will this email be sufficient with a small report documenting the activities at a later date?

Thanks

Jeremy,

Based upon your request, the schedule for submittal of results from the pilot study is extended to April 16, 2010.

Regards,

Jerry Wickham

The subject report has been uploaded to your website.

Jerry,

Please note that in this report AEI has requested a six month extension for the pilot study activities previously due on October 16, 2009. AEI understands that several extension request have been submitted, however would like to assure you that the pilot study activities will be completed prior to building occupancy. At this time all tenants (including the Head Start day care program), have been relocated away from the former dry cleaning operation. Pilot study activities are to be completed during building remodels which are planned to take place. However, the overall redevelopment of the property remains in the planning stages and has been delayed by several variables. Once redevelopment plans are finalized, construction for the new tenants will begin and again, the pilot study activities will be completed prior to building occupancy. Please let me know if you have any questions, and I apologize for all the delays.

Thanks
