vmail from Tom: very complete well written letter
Tom will probably need to take some more samples
brief letter w/samples. workplan review or just a brief letter
415-290-5034

conversation on 9/28/04 at 4:30 PM

splitting two sites: sampling on both
East site: 8 samples along building
additional perimeter samples on west side to document limit of excavation

i stated that we will not split the site into two separate cases - delay on one property will delay entire project

workplan: not a fancy explanation of plan, memo more than formal workplan
i stated that if it's not "formal" (i.e. stamped) then i won't issue a written response, but i will give him a verbal
agree/disagree with direction of work

use of arsenic as indicator is desired, i requested that he perform formal evaluation of chemical concentration breakdown
in the various samples (and confirm that he has enough samples to perform this comparison)
