Subject: Site Mitigation Plan Completion Activities
5885 Hollis Street
Emeryville, California
SLIC Site RO0002621, Emeryville Industrial Court

Dear Ms. Jakub:

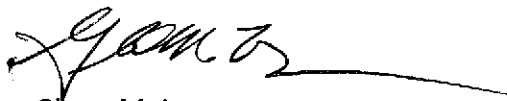

As a follow-up to our recent e-mail correspondence, I want to thank you for your review of the July 28, 2008 Groundwater Sampling letter report prepared by Treadwell & Rollo. As I indicated previously, the report represents the last remaining issue identified by Alameda County Environmental Health for SLIC Site RO0002621, located at 5885 Hollis Street in Emeryville, California.

Site management activities conducted at the property have included soil and groundwater investigation activities, soil excavation, construction dewatering, confirmation soil sampling, site capping, foundation and waterproofing. Those activities were completed in late 2006 and documented in the Treadwell & Rollo 5 January 2007 *Site Management Completion Report*. The groundwater sampling issue has been the only outstanding item for over a year. In order to expedite site management completion, the sampling described in the July 28, 2008 report was conducted on behalf of ES East Associates/Wareham Development, the current property owner.

Again, thank you for consideration of a letter indicating completion of the site management activities and that no further action is required for the Site located at 5885 Hollis Street in Emeryville, California.

If you have any questions, please contact me at (415) 272-6986.

Sincerely yours,

Glenn M. Leong
