Marie Henry called at 9:52 am left VM re NTC letter

MD returned call @ 2:55, left VM

Approx 3:30 Marie returned call; she and husband purchased site in 2000, had a bunch of testing done for a lead issue to get loan, got some funding as an Emeryville Brownfield. A review of ACEH case files indicate known issue is a lead case dating to pre 1995 (currently most recent report was 1995 investigation report). I requested either she and husband, or Emeryville claim site in Geotracker and upload documents from July 2005 at a minimum, and also upload to ACEH website so we have better understanding of case. Walk her through access to ACEH website so they can see what is currently known.
