Subject: Re: RO2633, 408 Linda Ave., Piedmont closure

Donna: I was wondering about the status of this closure. Is there anything you need from me? As I am sure you are aware, both PG&E and the City of Piedmont are anxious to see this property returned to use. Thanks very much for your assistance.

Sincerely, Sally Goodin

Donna:
Welcome back, I put the closure for the PG&E substation in you mail slot. I believe we can close the site which lies exterior to the existing building. Let me know if you have any questions.

Thanks

Barney

I just left you a voice mail about this but did not have time to give you the case number. Please let me know when we might expect to see the NFA for this site or if you need additional information from us. As you can imagine both PG&E and the City of Piedmont are very eager to see this site back in use. You can reach me either via email or telephone at 510-301-2261. Thanks very much for your assistance, Sally
