

February 16, 1994

Ms. Madhulla Logan Hazardous Materials Specialist Alameda County Health Care Services Agency 80 Swan Way, Room 200 Oakland, CA 94621

RE:

Work Plan Addendum for Additional Subsurface Site Investigation

and Risk Assessment

Former Island Gun Club, 500 Maitland Drive, Alameda CA

Dear Ms. Logan:

Per your request, this letters serves as an Addendum to the work plan dated February 11, 1994. Per our conversation on February 16, 1994, you requested additional information regarding the collection of samples from the proposed borings.

The two proposed borings will be installed beyond the known extent of soil contamination to;

- 1) define extent of lead and copper contamination within the groundwater,
- 2) to acquire background data on fill material similar to the on-site fill, and
- 3) to establish background levels of lead and copper in the soil and groundwater.

Soil samples will be collected from each boring every two to three feet starting at two feet below grade to approximately 15 feet below grade. It is anticipated that groundwater will occur approximately seven to ten feet below ground surface. Soil samples from each boring collected above the saturated zone will be submitted for analysis.

I have enclosed a time line for proposed work. If you have any question regarding this addendum or time line, please do not hesitate to contact me.

Sincerely,

Misty Kaltreider

Geologist

CC:

Mr. Ravi Arulanantham - Alameda County Health Care Services Agency

Mr. Rich Hiett - Regional Water Quality Control Board

Mr. Aidan Barry - Harbor Bay Isle Associates

Mr. Bob Warnick/Mr. Dick Rudloff - City of Alameda

Ms. Donna Dehn - Health/Sciences Consulting

Mr. Gary Pischke - Herbert and Associates
