Re: NO FURTHER ACTION FOR PARCEL #99B-8103-38, LIVERMORE, CA

Dear Mr. Rinker:

Thank you for the analytical report concerning the subsurface investigation conducted at the above referenced parcel. That report has been reviewed and it is our opinion that low levels of petroleum hydrocarbons detected in groundwater at approximately 27-32 feet in depth is not a result of past use at the site. Residual hydrocarbons in groundwater should pose no risk to human health or the environment.

Based upon the available information, including the current land use, and with the provision that the information provided to this agency was accurate and representative of site conditions, no further investigations or cleanup actions are required. Please be aware that further work may be required if conditions change or a water quality threat is discovered at this specific site.

If you have any further questions concerning this matter, please contact me at (510) 567-6700.

Sincerely,

A handwritten signature in black ink, appearing to read 'eva chu', written in a cursive style.
