Ref: Anatec Technologies, Inc. 6082 Stewart Avenue, Fremont, CA - 94538

Dear Mr. Ruhullah:

This Department is in receipt of the Floor inlet/outlet cleaning report, dated May 19, 1998; a report dated March 13, 1998 which includes information on the cleanup conducted on-site; a report dated June 15, 1998 which includes the final wipe sample results; and, the final request for closure dated June 11, 1998, all prepared for the above referenced site.

Anatec used the referenced property as a surface mount assembly plant which included wave soldering using lead/tin solder. Based on the previous use of the property, wipe samples were collected from pertinent areas on January 27, 1998 and analyzed for lead. The laboratory results indicated the presence of significant amounts of lead. Subsequent to the finding, all pertinent areas were rinsed with clean water, floors were sanded and painted with epoxy coating, all exhaust ducting was removed, rinsed and dried, and floor drains were cleaned and vacuumed. The materials and residues from the clean-up activities were disposed as hazardous waste at the USPCI Grassy Mountain Facility in Knowles, UTAH. Subsequent to cleanup activities confirmation samples were collected on February 10, 1998 May 13, 1998 and June 12, 1998 from the walls, floors light fixtures and inlet/outlet areas.

Based on the results of the confirmation samples, the site does not pose a risk to public health.

Sincerely,

Madhulla Logan
Hazardous Material Specialist
