Subject: 3rd Quarter 2008, Groundwater Monitoring report
20957 Baker Road
Castro Valley, California 94546
Leak Case RO0002739
AEI Project # 273928

Dear Mr. Carlton:

Attached is a copy of the third quarter 2008 groundwater monitoring event at the above referenced site for your information.

The site was a minimal release at an inherited site with a forgotten UST. The county inspector refused allow over excavation at the time of the removal. Over excavation at would have removed the source and there would have been nothing to find by the time the follow up investigation was carried out.

The site and USTs had been overlooked, forgotten and not used in 15 to 16 years. The county inspector made a big deal about the tank being forgotten for 16 years and verbally threatened Mrs. Piazza and her sister with jail time for unpermitted tanks. As a result, the Piazzas were refused by the State Fund.

If the Donna continues with her demands that we prove where the hydrocarbons went, this case will be appealed. Personally, I have wasted way too much of my time in meetings that weren't necessary already.

If you have any questions I can be reached at 925-944-2899, extension 122.

Sincerely,
AEI Consultants

Robert F. Flory, P.G.
