Subject: Shell 135032, 1601 Webster St., Alameda ACDEH Fuel Leak Case RO2745

Dear Mr. Katz,

Alameda County Department of Environmental Health (ACDEH) has reviewed the recently submitted report entitled Well Protection Plan (WPP), dated May 7, 2014, and prepared by Conestoga-Rovers and Associates for the subject site. ACDEH conditionally approves the WPP provided the following technical comments are addressed.

Technical Comments

The WPP states groundwater monitoring well S-5 will have a delineator placed over the well box and site personnel will be instructed not to drive heavy equipment over the well box with heavy equipment. This requirement should apply to all the site groundwater monitoring wells. Additionally, a responsible person should be designated to direct construction traffic to insure the well covers are not to driven over by heavy equipment. The designated responsible person should be present on site prior to the arrival of the heavy equipment, be present during the removal activities, and be present through the de-mobilization and heavy equipment transport off site.

Thank you for your cooperation. Should you have any questions regarding this correspondence or your case, please call me at (510) 567-6764 or send an electronic mail message at keith.nowell@acgov.org.

Regards,
Keith Nowell
