Entry Type: Phone call
Company: CRA

Start: Wed 8/14/2013 12:00 PM
End: Wed 8/14/2013 12:05 PM
Duration: 5 minutes

Received a call from Peter Schaefer, consultant with Conestoga-Rovers & Associates for RO2745- Shell Station at 1601 Webster, Alameda. Mr. Schaefer was inquiring about the status of my closure review. I told him I have yet to make a formal closure presentation to my supervisor. He asked if the semi-annual groundwater monitoring could be suspended in the meantime. After a brief review of the data I said the number of wells sampled could be reduced, but I would need to determine which wells could be eliminated. I told him I would look into it. After an internal discussion it was decided the well sampling could be suspended until a formal closure presentation was made.
