

Meeting with Mark P. Chips of Chips Environmental Consultants
on 3-27-87

Person present: Mark Chips
Larry Seto

Mr. Chips informed me he would survey Pappalys property with a total hydrocarbon sniffer and with a G.C. with a FID and ECD detector. He has contracted a drilling contractor to take soil borings.

I informed Mr. Chips that since his mobile laboratory has not been certified by the state, his results would have to be verified by a certified laboratory before closure. I also told him the clean-up must be done to background levels.
