**Subject:** 23836 Saklan Road, Hayward, Final Soil Cleanup

Mark,

We are scheduled to perform the final shallow soil excavation and off-site disposal at the 23836 Saklan Road property in Hayward this Wednesday, June 4.

There had been a delay in getting back out there due to some sort of planning issue with the city and our client. Our client has asked that we now proceed with the work. Our contractor is making one day available for us, this Wednesday.

We collected a couple of shallow soil samples last week and the results were favorable, so we have the lateral extent of the excavation defined. The land owner has signed the manifests, so we are ready to go. We also have a new generator number.

Once the work is performed we'll proceed with wrapping up a final report and the closure summary. At this point, it is looking like one or two truckloads of soil. We plan to perform the work Wednesday morning; finishing in the afternoon.

Feel free to call with any questions. I'll be in the field tomorrow, but available by cell 916-704-4715.

Thank you,  
Tim.
