Dear Mr. Bloodworth:

I am in receipt of the document "Summary of Groundwater Sampling Events" dated April 10, 1996, prepared by Metcalf & Eddy for the above referenced site. This document was submitted in response to additional groundwater sampling requested by this Department in a letter dated August 4, 1994.

Groundwater monitoring was conducted for two consecutive quarters in April 1995 and in July 1995 and the groundwater samples were analyzed for VOC's, TPH as gasoline, TPH as diesel and priority pollutant metals. The laboratory analysis of the groundwater samples did not detect any of the contaminants in concentrations above the detection limit.

Based on the results of the current and previous investigations submitted to this Department, the site does not pose a threat to public health and no further action is needed. If you have any questions, you may reach me at (510) 567-6764.

Sincerely,

Madhulla Logan  
Hazardous Material Specialist
