

November 9, 1995
Meeting ^{11/9/95} Airport Plaza
23958 Hesperian Blvd.

(30x30)

Hugh will write a letter outlining jurisdiction of different issues of case (ie. Soil, H₂O etc)

Van Brunt has completed all gw work for the RWQCB & in doing so they have collected some soil samples.

Now for AICO. they are planning to complete soil samples along sewer lines.

Will be preparing a sample point plan for approval but initially sampling will be based on dye test.

→ Will be using a dye test to locate leaks

The other cleaners located NE (adjoining west cleaner) needs to be addressed: Floor drains are not apparent - when flooring is removed then ~~this area~~ they will verify sampling locations.

~~3~~ 3 sample/boring
minimum 4 borings

→ Propose an extra along sewer line

→

Dec. 12th - final report

Letter out approving methodology; including 1 extra sampling point along sewer line at Mandarin Port outlet
