re: Site closure at Washington & Halycon, San Leandro

Dear Mr. Heavey

The Alameda County Environmental Health Department, Hazardous Materials Division, has completed its review of the soil and water sampling, and laboratory analyses for the referenced site. Based on review of information made available to the Division, it appears that no further investigation or remedial work is necessary.

Additional work may become necessary if conditions change, or a new threat to water quality is discovered at the site.

If you have any questions please contact me at (415) 271-4320.

Sincerely,

A handwritten signature in cursive script, reading "William F. Faulhaber".

William F. Faulhaber
Hazardous Materials Specialist
