

4/30/96 tel con w/ Tom Landerbach requested analytical results referred to in Oct 25, 1988 report for 2 confirmation samples from bottom of excavation. No data provided in report. It looks like even if data are available, they would only be for TPH + BTX not at ~~chem~~ chemicals of concern ~~in it~~ including the ones listed in pencil above. Said will check w/ trace Labs they will try to locate results in their archives

5/17/96 tel con - message to Tom Landerbach 232-9608
need to discuss performing boring in
