Summary Report

**Phase I Site Assessment
at
1372 Ocean Avenue
Emeryville, California 94608**

INTRODUCTION

A Phase I Site Assessment (ASTM Standard E-1527) was conducted by International Geologic at 1372 Ocean Avenue, Emeryville, California. The purpose of this assessment was to evaluate the conditions of the site with respect to activities, materials, or practices which are subject to environmental regulations, and to identify potential sources of contamination on-site and within a one-mile radius of the site. **The ASTM Standard considers analysis for asbestos containing materials (ACM's) and lead paint to be beyond the scope of work.**

This assessment consisted of:

- o Conducting a site walk over.
- o Interviewing the current site occupant and owner.
- o Reviewing historical sources of information for the site and surrounding area dating back to 1903.
- o Summarizing the local geology and hydrogeology.
- o Reviewing Federal, State, and local agency records pertaining to the subject property and surrounding area within a one-mile radius of the site.
- o Reviewing information pertaining to a 1997 subsurface investigation related to an underground fuel storage tank formerly located beneath the property.

SITE DESCRIPTION

Site Location

The site is located at 1372 Ocean Avenue, between Hollis and Doyle Streets in Emeryville, California (see Site Vicinity Map, Figure 1). A large, asphalt surfaced parking lot that is part of the property that contains the building at 1289 65th Street (Oakland Diesel Distributors), adjoins the subject site to the north. To the west, the site adjoins the yard area of a vacant industrial building at 6460 Hollis Street. An asphalt surfaced parking lot for "Healthsouth Redicare Medical Clinic" adjoins the subject property to the east at 1350 Ocean Avenue. The sidewalk for Ocean Avenue adjoins the subject property to the south. The immediate surrounding area is a mixture of industrial and commercial property, with residential properties extending east from Doyle Street.

Assessors Information

The Assessors Parcel Number for the subject property is 49-1484-5-1. The area of blocks and parcels that includes the subject property, is designated by the Alameda County Assessor as "Map of The Landregan Tract-Ranchos of V & D Peralta". A copy of the Assessor's Parcel Map for the area described above is presented in Figure 2.

Site Configuration

The property measures approximately 100 feet wide by 116 feet deep yielding an area of about 11,600 ft², and is relatively flat with an elevation of about twenty-five feet above mean sea level (USGS, 1993). A warehouse style building exists on the property with about 6,300 ft² of warehouse space plus 1,400 ft² of office space on two floors. The warehouse has a concrete slab-on-grade floor, and is accessed by means of three man-doors and one roll-up truck door on the Ocean Street side, with an additional roll-up door located at the north side of the building. Approximately 2,000 ft² of covered storage adjoins the west side of the building where a 2,000 ft² concrete and asphalt surfaced storage yard is located. An additional entrance to the building and upstairs office is accessed from the yard area. The western side of the property is fenced, with a fence and gate on the south side permitting access to the yard area. With the exception of a fence at the north end of the yard area, the remainder of the site boundary is demarked by the building footprint. The site layout is depicted in a Site Plan/Project Area Map presented in Figure 3.

LOCAL GEOLOGY/HYDROGEOLOGY

Geology

The area of Emeryville that includes the subject site has been mapped by Helley, *et al* (1979) as "Unconsolidated, plastic, moderately to poorly sorted silt and clay rich in organic material". Beneath the alluvial units are relatively impermeable, consolidated rocks of Jurassic to late Tertiary Age Franciscan Complex, which consist mainly of marine sedimentary rocks with some volcanic rocks and serpentinite. The site lies about 2 miles southwest of the inferred trace of the Hayward Fault.

A subsurface investigation conducted on the subject site in 1997 that involved soil excavation and drilling to a depth of 16 feet below the ground surface (bgs) indicated that the upper 7 feet of soil is silty clay, while the 7 to 11 foot interval consisted of sandy clay to clayey sand. From 11 feet to approximately 16 feet bgs, subsurface materials consist of a very stiff silty clay (International Geologic, 5/7/97 & 12/12/97).

Soil borings drilled in 1992 during a soil and groundwater investigation on the adjoining property to the west at 6460 Hollis Street, showed the upper 16 feet of subsurface soils to consist of "Silty Clay" and "Clayey Sand" (Hageman/Aguiar, 6/23/92).

Hydrogeology

The depth to first encountered groundwater beneath the subject property as measured during drilling in October 1997, was approximately 7.5 feet bgs under slightly confined conditions with the saturated zone extending to approximately 11 feet bgs (International Geologic, 12/12/97). The depth to first encountered groundwater as measured in 1992 during drilling at 6460 Hollis Street was approximately 5 feet bgs. The direction of groundwater flow beneath the Hollis Street property has been calculated to be approximately to the west (Hageman/Aguiar, 10/13/95). Groundwater beneath the area of the site is reportedly not used for municipal water supply or farm irrigation.

PAST AND PRESENT SITE USAGE

Sanborn Fire Insurance Maps

Sanborn Maps depicting the subject site revealed the following information regarding past site usage:

- 1903:** The subject site is depicted as a "Corral".
- 1911:** The eastern portion of the site is depicted to contain a dwelling with the address 1402 Ocean Avenue. The western portion of the site area is vacant.
- 1950:** The site is shown to contain a small office and a garage, both adjacent to Ocean Avenue. The same dwelling depicted in the 1911 map is shown.

Copies of the 1911 and 1950 Sanborn Maps reviewed for this assessment are presented in Figures 4 and 5. The 1903 map was reviewed at the Oakland Public Library, and could not be copied.

Building Permit Review

A review of building permits for the subject property revealed information dating back only to 1979, and were for minor alterations to the building. No permits were available at the Emeryville Public Works Department indicating the year the present structure on the property was built.

Telephone Directory Review

A review of former telephone directories revealed the following information regarding names of businesses formerly occupying the subject property:

- 1951-1957:** "Danny Boy Trucking".
- 1961-1976:** "Kaiser Refractories Warehouse".
- 1977-1979:** "Brantley Sales And Service" and "Wayco Sales".
- 1979-1997:** Not listed.

Aerial Photo Review

A review of aerial photographs of the subject property revealed the following site information:

- 1939:** The north side of the central part of Ocean Avenue between Hollis and Doyle Streets appears to contain a number of small buildings that are similar in appearance to residential property east of Doyle Street.
- 1946:** As 1939 (?)
- 1968:** The present day site configuration is visible.
- 1977-1989:** The site appears as it does today.

Copies of the aerial photographs reviewed for this assessment are included in the "Photos" section to this report. A 1983 aerial photograph reviewed at the Emeryville public works office, is not included in the photos section.

Site Usage Summary

Sanborn maps, building permit applications, former Oakland/Berkeley telephone directories, aerial photographs and information provided by the current owner/occupant of the property, Mr. Doug Ralston, indicate the property was originally used as a stable and corral during the early 1900's. By approximately 1910 until the late 1940's the property contained a dwelling and garage that was part of the residential neighborhood that extended east of Doyle Street. The present day building was built in approximately 1950, and was first occupied by "Danny Boy Trucking". By the late 1950's or very early 1960's until the mid-1970's, the property was used by "Kaiser Industries" as a refractory brick warehouse.

By the mid 1970's until present, the property has been used by "Production (Plant) Insulation Company" for storage of insulating materials. According to the president of Plant Insulation Company, Mr. Doug Ralston, information in the 1977-1979 telephone directories stating that the businesses "Brantley Sales And Service" and "Wayco Sales", occupied the subject property is incorrect. Production (Plant) Insulation Company is an asbestos and insulation contracting business. According to Doug Ralston, the subject property was used as a warehouse for equipment, vehicles, and non-asbestos containing insulation materials. Currently, the warehouse contains only a small amount of equipment and material. The offices, storage yard and sheds are empty.

PAST AND PRESENT ADJACENT PROPERTIES USAGE

The following historical information was acquired from Sanborn maps, building permit applications, aerial photographs and former Oakland/Berkeley telephone directories.

6460 Hollis Street

This property adjoins the subject site to the west. The property was used by the "Sterling Paint Company" who manufactured paint on the site from approximately 1918 until the mid 1960's. The "Zinc Lock Company" occupied the property from the mid to late 1960's until the mid 1970's. "RIX Industries", an air compressor parts and service business, occupied the property from the mid-1970's until 1997. A 1983 aerial photograph shows a significant amount of miscellaneous storage against the east fence (adjacent to the subject site) with the unsealed ground surface appearing dark. The property is currently vacant.

1350 Ocean Avenue

This property adjoins the subject site to the east. 1350 Ocean Avenue was residential from approximately 1910 until the 1950's, and was subsequently vacant until the mid 1980's when the present structure was built. The current site occupant, "Healthsouth Redicare Medical Clinic" has conducted business on the property from 1988 until the present.

1289 65th Street

This area adjoins the subject site to the northeast. The first documented use of the property was as the "Oakland Meat Company" stock stable, which was a large structure that was separated from the subject property by "Peabody's Lane" which at the time, was a well defined narrow street that ran along the northern property line of the subject site. By the 1930's, or early 1940's, the present structure was built on the northeast portion of the property fronting on 65th Street, with a large unpaved yard area actually adjacent to the subject site. The property was originally used by "Caine Steel", and continued to see use in the steel business until the 1980's. A 1983 aerial photograph of the area shows a considerable amount of material stored on the unsealed ground surface of the yard. Large above ground storage tanks located on the east side of the building, were originally used by the "Mohawk Petroleum" bulk materials facility until the 1970's, and are currently used by "Liquid Sugars Incorporated" at 1266 66th Street. Currently, the 1289 65th Street building is occupied by "Oakland Diesel Distributors", a business involved with sales of diesel engine parts.

Surrounding Area

The area surrounding the subject property has been predominately industrial since 1910-1920. The south side of Ocean Avenue across from the subject site and west toward Hollis Street was originally oil refineries- "Lewers Refinery" and "Capitol Refinery". Subsequently, this area became the site of a warehouse for "Sylvania Electric Products Incorporated", and is now the site of "Mix Publications", and "Getz Construction". The area to the northeast was utilized by a zinc dust manufacturer in the 1950's and a petroleum storage facility until the 1980's. "Brueners Furniture Company" operated a large warehouse across Hollis Street, and "Ryerson Steel" has operated a wholesale steel warehouse at 6491 Hollis Street since at least the early 1950's until present.

SITE WALK OVER

A walk over of the subject site was performed by International Geologic on April 7th, 1998, to observe the potential presence of hazardous materials on-site, note activities, materials, conditions or practices which are subject to environmental regulations, and to assess the potential for other environmental concerns. Photographs depicting features noted during the walk over are included in the "Photos" section attached to this report.

Warehouse Building & Offices

The majority of the subject building is open warehouse area, with a group of three offices and a reception area located at the southwest corner of the building. These rooms were empty at the time of the site visit, however no uses or equipment other than what would be expected for an office was evident in the office areas. An additional two room office that is accessible by a stairway leading from the yard area, showed no evidence of environmental liabilities.

At the time of the site visit, the warehouse was mostly empty except for some boxes of non-asbestos containing insulative material, one pallet of a liquid encapsulant, one vehicle and some miscellaneous tools and equipment. The concrete slab floor in the building was in very good condition. No significant stains or unusual odors were noted at the time of the site visit. No containers of hazardous substances were observed in the building. No evidence of above or below ground tanks or fill ports suggesting the presence of an underground tank was observed.

Yard/Storage Areas

The asphalt and concrete surface of the storage yard was in good condition. A covered garage style storage shed located at the rear of the yard, and an enclosed shed running the length of the main building were both empty at the time of the site visit. No hazardous substances were observed in the yard area, and no significant stains or unusual odors were noted in the storage yard or sheds at the time of the site visit.

One groundwater monitoring well is located in the southwest corner of the yard. The purpose for this well will be discussed in the "Site Environmental Work" section to this report. Two 55-gallon capacity drums are being stored in the yard. One drum contains soil that was generated during the well installation, and the other drum contains groundwater from the well sampling process. Both drums appeared to be in good condition and were not leaking at the time of the site visit.

Perimeter Areas

The north and east perimeter areas are asphalt parking areas, with the south perimeter consisting of the sidewalk for Ocean Avenue. No environmental liabilities were noted in these areas. The west property line adjoins that of the yard for 6460 Hollis Street. Some minor discoloration of the unsealed yard surface was noted on the other side of the fence on the Hollis Street property.

RECORDS REVIEW

Federal and State Records

Federal and State records were reviewed to determine whether releases of hazardous materials or petroleum product have occurred or been detected on-site, and to identify potential sources of contamination within a one-mile radius of the site. Details of the Federal and State records are included in a report in Attachment 1. The following summarizes the findings of the records review.

- o No (0) site within a one-mile radius of the property was listed on the Environmental Protection Agency's (EPA) National Priority List (NPL). The NPL identifies sites for priority cleanup under the Superfund Program.
- o The subject property does not appear on the EPA's De-listed NPL database. The De-listed NPL database tracks sites that the EPA no longer manages under its NPL program.
- o No (0) site within a one-mile radius of the property was listed on the EPA's Resource Conservation and Recovery Information System (RCRIS). RCRIS is a data base used by EPA to track sites which generate, transport, store, treat or dispose of hazardous waste.
- o Two (2) sites within a one-mile radius of the property were listed on the California Department of Toxic Substance Control CAL-SITES AWP (Annual Work Plan) List. CAL-SITES AWP is a data base maintained by The State of California which identifies known hazardous substance sites targeted for cleanup.
- o Twenty-two (22) sites within a one-mile radius of the property were listed on the California Department of Toxic Substance Control CAL-SITES List. CAL-SITES is a database which identifies known and potential hazardous substance sites.
- o Eight (8) sites within a one-mile radius of the property were listed on the Notify 65 List. Notify 65 is maintained by the California State Water Resources Control Board, and contains facility notifications about any release which could impact drinking water.
- o Eight (8) sites within a one-mile radius of the property were listed on the California Hazardous Material Incident Reporting System List (CHMIRS). CHMIRS contains information on accidental releases or spills of hazardous substances.
- o Sixty (60) sites within a one-mile radius of the property were listed on the State of California EPA CORTESE database. CORTESE lists sites having experienced a reportable release of toxic substances into the environment, or the potential for a release.
- o No (0) site within a one-mile radius of the property was listed on the State of California Water Resources Control Board "Toxic Pits" list. "Toxic Pits" identifies sites suspected of containing hazardous substances where clean-up has not been completed.

- o No (0) site within a 1/2-mile radius of the property was listed on the EPA's Comprehensive Environmental Response, Compensation, and Liability Act (CERCLIS) inventory. CERCLIS is a data base used by the EPA to track activities conducted under its Superfund program and contains sites which are either proposed to, or are on the National Priorities List (NPL), and sites which are in the screening and assessment phase for possible inclusion on the NPL.
- o The subject site does not appear on the CERC-NFRAP database. As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites that following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or contamination was not serious enough to require Federal Superfund action or NPL consideration.
- o No (0) site within a one-mile radius of the property was listed on the EPA's Corrective Action Report (CORRACTS) list. CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.
- o No (0) site within a 1/2-mile radius of the property was listed on the State of California Landfill database. The State Landfill database contains information on active, inactive and closed landfills.
- o Sixty-seven (67) sites within a 1/2-mile radius of the property were listed on the State of California Leaking Underground Storage Tanks (LUST) list. The State of California Water Resources Control Board maintains this list of leaking UST's.
- o Fifteen (15) sites within a 1/4-mile radius of the property were listed on the State of California Underground Storage Tanks (UST) list. The State of California Water Resources Control Board maintains this list of registered UST's.
- o Ten (10) sites within a 1/4-mile radius of the property were listed on the California EPA Facility Inventory Database (FID) database. FID contains active and inactive underground storage tank locations from the State Water Resources Control Board.
- o No (0) site within a 1/4-mile radius of the property was listed on the State of California Above Ground Storage Tank (AST) database. The State of California Water Resources Control Board maintains this list of registered AST's.
- o The subject property is not listed on the EPA's Resource Conservation Recovery Act (RCRA) Administration Action Tracking System (RAATS) database. RAATS contains information on enforcement action pertaining to major violators under RCRA.

- o No (0) site within a 1/2-mile radius of the property was listed on the State Water Resources Control Board Waste Management Unit Database System (WMUDS) or the State of California Solid Waste Activity Tracking (SWAT) database. The State maintains these lists for program tracking and inventory of waste management units and contains information on groundwater monitoring and landfills.
- o Thirty-two (32) sites within a 1/4-mile radius of the property were listed on the State of California Hazardous Waste Information System (HAZNET) list. The State of California Environmental Protection Agency (CAL-EPA) maintains this list of hazardous waste generators and hazardous waste treatment, storage and disposal facilities.
- o Fifteen (15) sites within a 1/4-mile radius of the property were listed on the EPA's RCRIS "Small Quantity Generator" (SQG) list. The RCRIS Small Quantity Generator list includes information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the RCRA. **The subject property appears on the SQG list.**
- o Seven (7) sites within a 1/4-mile radius of the property were listed on the EPA's RCRIS "Large Quantity Generator" (LQG) list.
- o The subject property is not listed on the Federal Hazardous Materials Incident Report System (HMIRS) database. The Department of Transportation maintains this list of hazardous material spill incidents.
- o The subject property is not listed on the EPA's PCB Activity Database (PADS). PADS identifies generators, transporters and other handlers of PCB's.
- o The subject property is not listed on the EPA's Emergency Response Notification System (ERNS). ERNS records information on reported releases of oil and hazardous substances.
- o **The subject property appears in the EPA's Facility Index System (FINDS).** The Facility Index System (FINDS) contains information and "pointers" to other sources that contain more information on the storage and transportation of hazardous materials or waste.
- o The subject property is not in the EPA's Toxic Release Inventory System (TRIS). TRIS identifies sites which release toxic chemicals to the air, water and land.
- o The subject property is not listed on the EPA's Toxic Substances Control Act (TSCA) database. TSCA identifies manufacturers and importers of chemical substances.
- o The subject property is not listed on the Nuclear Regulatory Commission's (NRC) Material Licensing Tracking System (MLTS) database. MLTS identifies sites that possess or use radioactive materials.

- o The subject property is not listed on the EPA's National Priority List Liens list (NPL LIENS). NPL LIENS identifies property for which a lien has been filed through which the USEPA has the authority to recover remedial action expenditures.
- o Eighteen (18) sites within a 1/2-mile radius of the property were listed on the State of California Non-Fuel Leaks (SLIC) database.
- o Two (2) sites within a one-mile radius of the property was listed on the State of California Department of Health Services Bond Expenditure Plan database.
- o No (0) site within a one-mile radius of the property was listed on the EPA's Records of Decision (ROD) database. ROD documents mandate a permanent remedy at an NPL site containing technical and health information to aid in the cleanup.
- o No (0) site within a one-mile radius of the property was listed on the EPA's Resource Conservation and Recovery Information System "CONSENT" database. CONSENT tracks legal settlements that establish responsibility for local Superfund sites.
- o The subject property is not listed on the State of California Waste Discharge System database (WDS). WDS sites have been issued waste discharge requirements.
- o No (0) sites within a one-mile radius of the property was listed on Real Property Scan's "ENVIROHAZ" Former Manufactured Gas (Coal Gas) Sites list.

SITE ENVIRONMENTAL WORK

Suspected UST Area Excavation/Sampling

During preparations for the sale of the property, a suspected former fuel dispenser island was identified against the west fence in the yard area, suggesting the possible existence of an underground storage tank (UST) beneath the property. Mr. Doug Ralston, President of Plant Insulation Company, had no knowledge of a UST beneath the property, and subsurface locating techniques utilized near the area of the apparent fuel dispenser island, failed to locate a tank.

Subsequently on March 31, 1997, the suspected UST and dispenser areas were investigated by exploration/excavation. During excavations that reached approximately 4 feet below the ground surface (bgs) in a 15 foot by 15 foot area, an abandoned supply line and large sections of broken concrete slab were brought to the surface, suggesting that at least one UST had been removed at some time prior to Plant Insulation Company's ownership of the property (approximately 1975).

On April 10th, 1997, one soil sample was collected from the excavation bottom at a depth of 5.5 feet bgs, and one grab groundwater sample was collected at a depth of approximately 6.5 feet bgs from a hand augured boring (B-1) in the excavation area (see Figure 3). The samples were laboratory analyzed for petroleum hydrocarbons as gasoline (TPHg) and diesel (TPHd), total and

dissolved lead, and volatile and semi-volatile organic compounds. Analytical results of the soil sample indicated the presence of 150 parts per million (ppm) TPHg and 430 ppm TPHd. The groundwater sample contained 330 parts per billion (ppb) TPHg and 7,000 ppb TPHd. A soil sample collected from the former dispenser area at a depth of 2 feet bgs contained 210 ppm TPHd. The excavation was subsequently back-filled with clean soil and the area re-surfaced with asphalt.

Monitoring Well Installation/Sampling

A requirement for a groundwater monitoring well to determine the extent of soil and groundwater contamination beneath the property, was set forth in a letter from the Alameda County Health Care Services Agency (ACHCSA) dated July 17, 1997.

On October 11, 1997, boring SB-1 was drilled to a depth of 16 feet bgs in a location about 9 feet in the downgradient direction (to the west) of the former UST location. Laboratory analyses of soil samples collected from boring SB-1 indicated the presence of up to 180 ppm TPHg and 500 ppm TPHd at a depth of 5.5 feet bgs. A groundwater monitoring well was constructed in boring SB-1 at the location shown on Figure 3. Laboratory analytical results of the initial groundwater sample collected from well on October 19, 1997, and the most recent sampling which took place in March 6, 1998, are presented in Table 1 on the following page.

Detailed descriptions regarding the discovery of the former underground fuel tank location, monitoring well installation and laboratory analytical results of soil and groundwater samples collected on-site, can be reviewed in the International Geologic Letter Report, Subsurface Investigation Related To A Suspected Underground Storage Tank Location, For 1372 Ocean Avenue, Emeryville, California, May 7, 1997, International Geologic Report, Groundwater Monitoring Well Installation Report For 1372 Ocean Avenue, Emeryville, California December 12, 1997, and International Geologic Report, First Quarter Groundwater Monitoring Report For 1372 Ocean Avenue, Emeryville, California, April 1, 1998.

Current Status

Groundwater monitoring issues at subject site are under active management by Ms. Susan Hugo of the ACHCSA. The groundwater monitoring well on the subject property is scheduled to be monitored for three additional quarters, (June, September and December of 1998). If the levels of contaminants remain stable or decrease, site closure will be recommended.

TABLE 1
CUMULATIVE RESULTS OF LABORATORY ANALYSES OF GROUNDWATER SAMPLES
1372 Ocean Avenue
Emeryville, California

Compound	Sample Date 10/19/97	Sample Date 3/6/98
TPHg	<50	57 ^a
TPHd	120 ^b	120 ^b
MTBE	<5.0	<5.0
Benzene	<0.005	<0.005
Toluene	<0.005	<0.005
Ethylbenzene	<0.005	<0.005
Xylenes	<0.005	<0.005
1,1- Dichloroethene	0.57	<3.0
cis 1,2-Dichloroethene	12	16
trans 1,2-Dichloroethene	2.2	<3.0
Tetrachloroethene	6.0	<3.0
Trichloroethene	41	82
Trichlorofluoromethane	2.5	3.8
Vinyl Chloride	1.1	3.0

Results expressed in parts per billion (ppb).

TPHg: Total petroleum hydrocarbons as gasoline.

TPHd: Total petroleum hydrocarbons as diesel.

MTBE: Methyl-Tertiary-Butyl-Ether.

a: One to a few isolated peaks present

b: Diesel range compounds are significant; no recognizable pattern.

NEARBY SITE ENVIRONMENTAL WORK

The properties listed below appeared on the environmental database search, and were researched to determine the potential for soil and/or groundwater contamination at the site impacting the subject property via groundwater. References to "up gradient" and "down gradient" mean that a given site is located at a higher or lower elevation on the inclined plane of the groundwater table as compared with the subject property. In general, groundwater flows toward lower elevations on the plane. References to "cross gradient" mean that a given site is located horizontally along the plane of the water table.

Information regarding past and current environmental investigations being conducted at sites within approximately 1/8 mile from the subject property are outlined below:

- o **6460 Hollis Street.** Site appears on the State LUST list. This property adjoins the subject property to the west, and has been the subject of soil and groundwater investigations since three monitoring wells were installed on the property in 1992 to monitor five USTs that were to be abandoned in place beneath the facility building. Soil samples collected during the well installations, contained concentrations of up to 1,800 ppm TPHg, 3,000 ppm TPHd, 2,400 ppm kerosene, 2,100 ppm mineral spirits, and 31,000 ppb tetrachloroethene. The five USTs beneath the building were subsequently abandoned in place, and five additional USTs were removed from beneath the yard area adjacent to the east side of the building in December 1994 (see Figure 3). Corrosion of the tanks with apparent through-going holes were noted at the time that the five USTs located outside the building were removed, indicating that leakage had occurred.

Initial sampling of the monitoring wells in 1992, indicated concentrations of up to 9,300 ppb TPHg, 20,000 TPHd, 20,000 ppb kerosene, and 21,000 ppb TPH as mineral spirits to be present in a sample collected from well MW-3. In addition to petroleum hydrocarbons, up to 40,000 ppb Methyl-Ethyl-Ketone, 2,200 ppb Tetrachloroethene and 300 ppb Trichloroethene were detected in samples from well MW-3. Generally lower concentrations of contaminants were detected in wells MW-1 and MW-2 which are located on the west side of the abandoned UST locations in the building.

Groundwater monitoring conducted at the property in October 1995 indicated concentrations of up to 1,200 ppb TPHg, 2,600 TPHd, and 450 ppb TPH as mineral spirits in samples collected from the monitoring wells. In addition to petroleum hydrocarbons, up to 6,600 ppb Methyl-Ethyl-Ketone, 14 ppb Tetrachloroethene and 53 ppb Trichloroethene were detected in groundwater samples. Groundwater flow direction beneath the site was calculated as approximately west towards Hollis Street using measurements from the three on-site wells on October 13, 1995.

The 6460 Hollis Street property is downgradient from the subject site, reducing the threat to groundwater beneath the subject site. However, because the property was used for the manufacture of paint for over 40 years, coupled with its close proximity to the subject site, it is not unreasonable to suggest that some of the compounds detected in groundwater beneath the subject site (particularly those that were never stored on the subject site), could have originated from 6460 Hollis Street. The site is currently under active management by the ACHCSA.

- o **1351 Ocean Avenue.** (Approximately 300 feet to the east of the subject property). Site appears on the State LUST list. A 4,000 gallon capacity underground diesel storage tank was removed from this property in 1988. The case was considered a "soil only" type, no action was taken, and the Regional Water Quality Control Board (RWQCB) granted site closure for this property in 1995. This site is hydraulically cross/upgradient from the subject property, but is unlikely to be a potential source of contamination to the subject site.
- o **1301 65th Street.** (Approximately 200 feet to the north of the subject property). Site appears on the State LUST list. An underground gasoline storage tank of un-reported capacity was removed from this property in 1988. Gasoline and 1,2-Dichloroethene was detected in the groundwater. The RWQCB granted site closure for this property in 1995. This site is hydraulically cross gradient from the subject property, minimizing the risk of this property as a potential source of contamination to the subject site.
- o **1200 65th Street.** (Approximately 500 feet to the northeast of the subject property). Site appears on the State LUST list. An underground diesel storage tank of un-reported capacity was removed from this property in 1985. The case was considered a "soil only" type, no action was taken, and the Regional Water Quality Control Board (RWQCB) granted site closure for this property in 1995. This site is hydraulically cross/upgradient from the subject property, but is unlikely to be a potential source of contamination to the subject site.

DISCUSSION

It should be noted that the general quality of shallow groundwater beneath the entire Emeryville area has been degraded over the last few decades, and that there are 67 LUST cases alone within a 1/2 mile radius of the subject site. The presence of substances in the shallow groundwater beneath the subject property such as trichloroethene, dichloroethene and other chemicals not known to have been stored there, suggests that groundwater beneath the subject property may in fact be impacted from one or more off-site sources.

State and Federal laws regarding site mitigation (Comprehensive Environmental Response, Compensation and Liability Act of 1980/Superfund Amendments and Reauthorization Act (42 United States Code 9607 (a) (1)) and Chapter 6.8 of the Health and Safety Code (H&SC) provide that persons owning property where "...hazardous substances have come to be located..." may be liable for response costs and may be subject to various orders. This definition is without regard to the origin of the hazardous substance. Thus, such land owners, according to the law are responsible parties. The statutes also provide certain defenses to liability. In some cases, groundwater flow carries contaminants in the subsurface under property owned by a person having no relationship to the original release, except ownership of property over contaminated groundwater.

As a general policy, regulatory agencies will not enforce action against a person who is a responsible party solely on the basis of ownership of land over contaminated groundwater (California Department of Toxic Substance Control, Management Memo 90-11 December 7, 1990). There is only a low probability therefore, that action would be required to remediate contamination that originated off-site unless there was an immediate or extreme health hazard.

FINDINGS

- 1) The first documented use of the subject property was as a stable and corral during the early 1900's. By approximately 1910 until the late 1940's, the property contained a dwelling, and garage. The present day building was built in approximately 1950, and was first occupied by "Danny Boy Trucking". By the late 1950's or very early 1960's, until the mid-1970's, the property was used by "Kaiser Industries" as a refractory brick warehouse. By the mid 1970's until present, the property has been used by "Plant Insulation Company" for storage of non-asbestos containing insulating materials.
- 2) An underground fuel (probably diesel) storage tank (UST) of unknown capacity, was removed from the yard area of the property prior to 1975. Soil samples collected from an exploratory excavation in 1997, contained up to 150 parts per million (ppm) Total Petroleum Hydrocarbons as gasoline (TPHg) and 430 ppm TPH as diesel (TPHd). A sample collected of groundwater that seeped into the excavation, contained 330 parts per billion (ppb) TPHg and 7,000 ppb TPHd.
- 3) A groundwater monitoring well was installed in the former UST area in October 1997, per the request of Alameda County. Groundwater samples collected in October 1997, and March 1998, contained 120 ppb Total Petroleum Hydrocarbons as diesel (TPHd) on both dates. Up to 82 ppb of volatile halocarbons (trichloroethene) was detected in the March 1998 sample. Monitoring of the well is expected to occur again in June, September and December 1998. If current contaminant levels in the groundwater beneath the site remain stable, or decrease over the next three quarters, site closure will be recommended.

- 4) The federal and state records search identified the subject property on two federal databases (SQG and FINDS) that identify it as one whose current occupant handles hazardous materials. "Production (Plant) Insulation Company" the current site occupant, handles and transports asbestos containing materials (ACM's). No ACM's are stored on the property, and no violations were noted in the database search.
- 5) Use of the property as a refractory brick warehouse by "Kaiser Industries" in the 1960's and 1970's, and use by "Production Insulation Company" from the mid-1970's until present, do not appear to have posed an environmental threat to soil or groundwater beneath the site. No significant staining, visible evidence of spills, unusual odors or other environmental liabilities were noted during the site walk through.
- 6) The inferred direction of groundwater flow in the vicinity of the site is approximately west/southwest based on regional and local topographic drainage patterns. Groundwater gradient calculations made in conjunction with an on-going subsurface investigation at 6460 Hollis Street, indicate the shallow groundwater flow direction to be approximately to the west.
- 7) Several soil and/or groundwater contamination cases exist within a 1/8th mile radius of the subject property. One of these cases is adjacent to the subject property to the west at 6460 Hollis Street. 6460 Hollis Street was the site of the "Sterling Paint Company" from approximately 1918 until the mid-1960's, and appears on the State of California LUST database identifying the site as having had leaking UST's, with resulting soil and groundwater contamination (TPHg, TPHd and Solvents). This site is hydraulically downgradient from the subject site, reducing the risk to groundwater beneath the subject site.
- 8) Low levels (less than 100 ppb) of volatile halocarbons such as trichloroethene and dichloroethene detected in groundwater samples collected from the on-site well in October 1997 and March 1998, probably have an off-site source. This finding is based on the industrial nature of the surrounding area since the early 1900's, and on no record existing of these compounds being used or stored on the subject property.

CERTIFICATION

I certify that the work presented in this report was performed under my supervision. To the best of my knowledge, the data contained herein is true and accurate, and the work was performed in accordance with professional standards.

Steve Bittman *4/29/98*

Steve Bittman Date
CA Registered Environmental Assessor No. 04991

LIMITATIONS

This report was prepared in accordance with guidelines established by the American Society for Testing and Materials (ASTM) Subcommittee on Environmental Assessments for Commercial Real Estate (Standard E-1527, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, 1997) and with generally accepted standards of environmental practice in California. This limited assessment was conducted solely for the purpose of evaluating environmental conditions at 1372 Ocean Avenue, Berkeley, California, and is intended to reduce but not eliminate uncertainty regarding the existence of recognized environmental conditions at the property assessed. Evaluation of conditions at and near the site for the purpose of this investigation is made from a limited number of observation points. Environmental conditions may vary away from the observation points available. Further investigation, including additional subsurface exploration and laboratory testing of soil and groundwater samples collected at the site, can aid in evaluating subsurface environmental conditions and reduce the inherent uncertainties associated with this type of limited environmental assessment. Accuracy or completeness of public and proprietary records used to conduct limited assessments of this type is not implied. No soil engineering or geotechnical references are implied nor should be inferred. No evaluation was made for the presence of asbestos on the subject property.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc. (EDR). The report meets the government records search requirements of ASTM Standard Practice for Environmental Site Assessments, E 1527-97. Search distances are per ASTM standard or custom distances requested by the user.

The address of the subject property for which the search was intended is:

1372 OCEAN AVE
EMERYVILLE, CA 94608

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the subject property or within the ASTM E 1527-97 search radius around the subject property for the following Databases:

NPL:..... National Priority List
Delisted NPL:..... NPL Deletions
RCRIS-TSD:..... Resource Conservation and Recovery Information System
Toxic Pits:..... Toxic Pits

Unmapped (orphan) sites are not considered in the foregoing analysis.

Search Results:

Search results for the subject property and the search radius, are listed below:

Subject Property:

The subject property was identified in the following government records. For more information on this property see page 9 of the attached EDR Radius Map report:

Site	Database(s)	EPA ID
PRODUCTION INSULATION COMPANY 1372 OCEAN AVE EMERYVILLE, CA 94608	RCRIS-SQG FINDS	CAD982320368

EXECUTIVE SUMMARY

Surrounding Properties:

Elevations have been determined from the USGS 1 degree Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. EDR's definition of a site with an elevation equal to the subject property includes a tolerance of -10 feet. Sites with an elevation equal to or higher than the subject property have been differentiated below from sites with an elevation lower than the subject property (by more than 10 feet). Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

AWP: California DTSC's Annual Workplan, formerly known as BEP, identifies known hazardous substance sites targeted for cleanup. The source is the California Environmental Protection Agency.

A review of the AWP list, as provided by EDR, has revealed that there are 2 AWP sites within approximately 1 Mile of the subject property.

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data comes from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 Miles of the subject property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency

A review of the HAZNET list, as provided by EDR, has revealed that there are 32 HAZNET sites within approximately 0.25 Miles of the subject property.

Review Status: Not reported
 Priority: Not reported
 Local Agency: Alameda County - Oakland, Hayward (unincorporated), Dublin, San Lorenzo, Albany, Castro valley
 Case Type: Soil contamination has occurred at such low levels as to not pose a threat to water quality. One of the following sets of conditions must be met: 1.) Initial soil contamination is less then 100 parts per million below the tank 2.) Low permeable soil (silts & clay) 3.) No shallow ground water, >50' Or 4.) Monitoring wells have been installed in appropriate locations and water analysis shows non-detect.

Primary Substance: Diesel
 Secondary Substance: Not reported
 Maximum Soil Concentration: 930
 Maximum Groundwater Impact: 120000
 Current Benzene in Groundwater: 0
 Maximum Benzene Concentration: 0
 Nuber of Wells: 1
 Depth to Groundwater: 3.84
 MTBE Contamination Level: 0
 Interim Remediation: Yes
 Interim Remediation Date: 11/03/1988
 Lead Agency: Local Agency
 Case List: FUEL
 Enforcement Type: 0
 Enforcement Date: 00/00/0000
 Responsible Party Search: Solvent - Identified and financially capable of performing work.
 Funding: Federal
 Date Status Was First Assigned - The following dates are assigned as the status progresses:
 Leak Confirmed: 00/00/0000
 Workplan Submitted: 00/00/0000
 Assessment Underway: 11/03/1988
 Pollution Characterization: 00/00/0000
 Corrective Action Plan: 00/00/0000
 Enforcement Action Date: Not reported
 Remediation Underway: 00/00/0000
 Monitoring Begun: 00/00/0000
 Case Closed: 01/11/1995
 Abatement: Replace Supply - provide alternative water supply to affected parties
 Comments: ARCHIVED 6/6/96 CONTROL NO 120-080 080

 Local Agency: Alameda County - Oakland, Hayward (unincorporated), Dublin, San Lorenzo, Albany, Castro valley)
 Case Type: Soil contamination has occurred at such low levels as to not pose a threat to water quality. One of the following sets of conditions must be met: 1.) Initial soil contamination is less than 100 parts per million below the tank 2.) Low permeable soil (silts & clay) 3.) No shallow ground water, >50' Or 4.) Monitoring wells have been installed in appropriate locations and water analysis shows non-detect.

Review Status: Not reported
 Priority: Not reported
 Local Agency: Alameda County - Oakland, Hayward (unincorporated), Dublin, San Lorenzo, Albany, Castro valley
 Case Type: Soil contamination has occurred at such low levels as to not pose a threat to water quality. One of the following sets of conditions must be met: 1.) Initial soil contamination is less then 100 parts per million below the tank 2.) Low permeable soil (silts & clay) 3.) No shallow ground water, >50' Or 4.) Monitoring wells have been installed in appropriate locations and water analysis shows non-detect.

Case Type: Soil contamination has occurred at such low levels as to not pose a threat to water quality. One of the following sets of conditions must be met: 1.) Initial soil contamination is less then 100 parts per million below the tank 2.) Low permeable soil (silts & clay) 3.) No shallow ground water, >50' Or 4.) Monitoring wells have been installed in appropriate locations and water analysis shows non-detect.

Facility Status: Not reported
 Update Status: Not reported
 Review Status: Not reported
 Priority: Not reported
 Local Agency: Alameda County - Oakland, Hayward (unincorporated), Dublin, San Lorenzo, Albany, Castro valley
 Case Type: Soil contamination has occurred at such low levels as to not pose a threat to

water quality. One of the following sets of conditions must be met: 1.) Initial soil contamination is less then 100 parts per million below the tank 2.) Low permeable soil (silts & clay) 3.) No shallow ground water, >50' Or 4.) Monitoring wells have been installed in appropriate locations and water analysis shows non-detect.

Leak Source:	Tank	Leak Cause:	Structure Failure
Facility Status:	Not reported		
Update Status:	Not reported		
Review Status:	Not reported		
Priority:	Not reported		
Local Agency:	Alameda County - Oakland, Hayward (unincorporated), Dublin, San Lorenzo, Albany, Castro valley)		
Case Type:	Soil contamination has occurred at such low levels as to not pose a threat to water quality. One of the following sets of conditions must be met: 1.) Initial soil contamination is less then 100 parts per million below the tank 2.) Low permeable soil (silts & clay) 3.) No shallow ground water, >50' Or 4.) Monitoring wells have been installed in appropriate locations and water analysis shows non-detect.		

Primary Substance:	Misc. Motor Vehicle Fuels

 Background: The site was formerly part of the Judson Steel Corp. founded in 1882. Judson Steel mainly used the site for storage and disposal of slag material. Heavy metals (lead, chromium, etc) are present in the soil and hydrocarbons and volatile organics appear to be migrating via groundwater from surrounding properties. Groundwater appears to be flowing towards Temescal Creek which discharges to the Emeryville Wetlands. Several endangered species are believed to inhabit the wetlands. A number of investigations have occurred at the sites by the Marriott Corporation, the Martin Group, Chiron, and Caltrans.
 The Department has entered into 2 separate walkin agreement associated with this property. The first agreement signed November 19, 1993 with the City of Emeryville Redevelopment Agency. The scope of work covers investigation and remediation with the

intended future use of the property being commerical.
The second agreement is with Caltrans. As part of the reconstruction of the Cypress freeway. Caltrans must relocate an EBMUD line.

 Background: The site is a drum recycling facility located in a commercial, industrial and residential area. The site was identified by the Surveillance and Enforcement Unit as part of the Statewide Drum Recycling program. Due to poor drum recycling practices, there have been periodic, massive releases of hazardous wastes at the site.
 Soils at the site are contaminated with heavy metals (lead,

S101272666

zinc, and arsenic); volatile organic compounds (toluene, xylene, and propanol); semivolatile organic compounds (naphthalene and phenol); and total petroleum hydrocarbons.

A remedial action plan was approved in May 1996. The plan called for building demolition, hot spot soil removal, capping and installation of a localized groundwater pump and treat system. Homes are located less than 500 feet from the site. San Francisco Bay is 3,000 feet from the site, and the Berkeley Aquatic Park is one-half mile from the site. Residents near the site are potential receptors for surface waste contamination and for wind-borne dispersion of contaminated soils.

Comment: State inspection. Samples taken.
Sample results received.
Facility Drive-By.
DHS inspected site as part of drum recycling project.
Preliminary Assessment Done: Enforcement case pending at this site.
This is the date the site was first listed pursuant to section 25356.
Drum recycling facility. Contaminants include Pb, Zn, Cr, organic compounds, and semi-volatile compounds.
RA SUMPS: The RP drained 11 sumps and check the integrity of the sumps. The completion report was submitted on this date. This is an early completion of a planned RA. 250 cubic yards of waste removed.
The Department settled with Kaiser bankruptcy for both of the Myers sites.
FS approved proposing soil and groundwater removal to industrial use standards.
FS amended to propose soil and groundwater removal to residential use standards.
The RAP was approved.
Phase Ia Design approved for building demolition plan.

Facility Status:	Not reported		
Update Status:	Not reported		
Review Status:	Not reported		
Priority:	Not reported		
Local Agency:	Alameda County - Oakland, Hayward (unincorporated), Dublin, San Lorenzo, Albany, Castro valley)		
Case Type:	Soil contamination has occurred at such low levels as to not pose a threat to water quality. One of the following sets of conditions must be met: 1.) Initial soil contamination is less than 100 parts per million below the tank 2.) Low permeable soil (silts & clay) 3.) No shallow ground water, >50' Or 4.) Monitoring wells have been installed in appropriate locations and water analysis shows non-detect.		

Primary Substance: Not reported

 Comment Date: 08/01/1980
 Comment: QUESTIONNAIRE RECEIVED. NO PROBLEM.
 Demolition of this former manufacturer/foundry (reportedly food packaging and historically, steel ball maker*) was observed. Dismantling of the corrugated steel warehouse with cutting torches left burning pieces on the black ground. However, the contractor's representative Terry Lohman, who reported the above history, claimed there were "no toxics or asbestos" and showed the City demolition permit. She also said a tank had been removed previously under Mr. Krenz. Jennifer Krebs, of Berkeley's Environmental Health group, the responsible agency, was notified of the site visit. The site is roughly 1 acre and is to be used as a parking lot. It is bordered by a BMW car dealership and Whole Earth Access, a retail department store. The demolition is nearly finished, though the lack of sampling of the stained ground raises questions about the adequacy of the cleanup. PNAs, oil and grease, gasoline, and

 Comment: INSPECTION(STATE) ASP. 1 SOIL SAMPLE COLLECTED.
 SAMPLE RESULTS SAMPLE: 130,000 PPM PCB'S
 This is the date the site was first listed AWP pursuant to
 Section 25356.
 This site is a two-acre, undeveloped, and vacant area lying
 directly west of the Westinghouse Electric Company facility.
 The principal contaminant on the site is PCB. The site was
 fenced to exclude trespassers. A mainline, fenced, railroad
 right-of-way also secures the site from trespassers.
 Delisted from Cortese.

Local Agency:	Alameda County - Oakland, Hayward (unincorporated), Dublin, San Lorenzo, Albany, Castro valley)		
Case Type:	Soil contamination has occurred at such low levels as to not pose a threat to water quality. One of the following sets of conditions must be met: 1.) Initial soil contamination is less then 100 parts per million below the tank 2.) Low permeable soil (silts & clay) 3.) No shallow ground water, >50' Or 4.) Monitoring wells have been installed in appropriate locations and water analysis shows non-detect.

Local Agency:	Alameda County - Oakland, Hayward (unincorporated), Dublin, San Lorenzo, Albany, Castro valley)		
Case Type:	Soil contamination has occurred at such low levels as to not pose a threat to water quality. One of the following sets of conditions must be met: 1.) Initial soil contamination is less than 100 parts per million below the tank 2.) Low permeable soil (silts & clay) 3.) No shallow ground water, >50' Or 4.) Monitoring wells have been installed in appropriate locations and water analysis shows non-detect.

EMERYVILLE MARKETPLACE (Continued)

S102008178

Activity: DISCOVERY
 Activity Status: NO FURTHER ACTION FOR DTSC
 Background: The site is a public market (Emeryville Market Place).
 The Site had been used for the manufacture of bituminous roofing products (tar paper), blending and packaging of oil-based paints and enamels, and as a trucking facility. The contaminants detected at the site include hydrocarbons, asphalt-like materials, and waste tar paper material. The Alameda County Environmental Health Department oversaw the site remediation. The hydrocarbon material was excavated, treated, and transported off-site for disposal. A Deed Restriction with DTSC was recorded against the property on August 7, 1995.
 Alternative Name: ABCO COMPANY

 Alternative Name: MERYVILLE MARKETPLACE
 Alternative Addr: BTW 64TH & POWELL ST ON N & S, BY HWY 80 EMERYVILLE, CA 94608
 Comment Date: 08/15/1980
 Comment: INSPECTION(STATE) DHS-ASP. Samples taken of tar-like materials. Presence of PCB's and heavy metals, referred to enforcement branch.
 INSPECTION(OTHER) TOOK SURFACE SAMPLES FOR ANALYSIS OF PCB's HEAVY METALS SOLVENTS HYDROCARCONS, VOLATILE ORGANICS AND ASBESTOS.
 INSPECTION(STATE) DHS-ASP. 31 CORE BORING SAMPLES TAKEN AT PACIFIC UNION PROPERTY; NO DETECTABLE LEVELS OF PCB's. (ADJ TO PROPERTIES OF WESTINGHOUSE & ITT GRINNELL SHOWED SIGNIFICANT LEVELS OF PCB'S).
 ENFORCEMENT(OTHER) DHS & RWQCB. APPROVAL GIVEN FOR CONSTRUCTION ON SITE.
 FACILITY IDENTIFIED ID FROM ERRIS
 WHEN INDUSTRIAL OPERATIONS CEASED, ALL STRUCTURES EXCEPT MARKETPLACE BUILDING, WAREHOUSE WERE DEMOLISHED. PROPERTY HAS BEEN DIVIDED AND IN A COMMERCIAL AREA NOW.
 Deed Restriction with DTSC recorded. Site remediation was overseen by Alameda County Environmental Health Department.

 Background: The site is a roadway construction project being undertaken by the City of Emeryville which involves the construction of a new city street from 64th Street to Shellmound Street. This area of the city was formerly a tideland and marshland where random filling with soil mixed with industrial wastes and various debris. Sampling results revealed the presence of petroleum hydrocarbons, heavy metals, PCB's & PNA's in the soil. Among the heavy metals, lead was detected as high as 4,500ppm. Groundwater in the area is contaminated but is not used for drinking or irrigation. The city plans to excavate contaminated soils and haul off-site. The completed roadway will act as a cap to prevent potential human exposure to contaminated soil.
 Alternative Name: AY STREET EXTENSION
 Alternative Addr: 64TH & POWELL STREETS
 EMERYVILLE, CA 94608
 Comment Date: 05/07/1996
 Comment: Voluntary Cleanup Agreement signed. 05/30/1996 PEA Completed. Report shows further action required. Heavy metals and TPH concentration detected in areas where new street is planned.

PRELIM ASSESS DONE GRD WTR CONTMNM. VERY LIMITED GRD WTR USE IN THE AREA. SITE INSP RECOMMENDED. SUBMIT TO EPA NFA FOR EPA: FAC IS NOT AN NPL CANDIDTE
Chevron has investigated and attempted to remediate this site since 1985. 18 wells, 150 soil borings, and removal of 10,000 cubic yards have been completed but hot spots of DCE at 7,000 ppb, TCE at 130 ppb, and diesel fuel are still in the groundwater. Soil removal reduced the contaminants although they remain beneath the loading dock, lab building, and railroad. Pumping and treating was considered, but dismissed based on the time required. Consultant Mittlehauser wants to use the PEA process to get the site "signed off", but the scope of the problem requires more oversight. The County and the SFRWQCB have been overseeing the project, and should continue. DTSC will oversee it only if fees are paid.

 Activity Status: CERTIFIED
 Background: The site was a former steel manufacturing plant which was operated over 100 years by Judson Steel and Barbary Coast Steel Corporation. These operations resulted in the contamination of the soil and groundwater with heavy metals total petroleum hydrocarbons (TPH) and PCBs. Caltrans took ownership of a strip of the properties as part of the overall new highway construction related to the Cypress project. Caltrans and East Bay Municipal Utility District relocated a major sewerline, and a new concrete double box culvert. The construction of these 2 structures required excavation through contaminated soils. Soils with lead over 5,000 ppm or TPH over 1,000 ppm were hauled off for proper disposal. Lower level contaminated soil was used as backfill material provided the material is covered with clean soil. Any groundwater encountered was treated and disposed by sewer.
 Alternative Name: YPRESS RECONSTRUCTION
 Alternative Addr: 4300 EASTSHORE HIGHWAY
 EMERYVILLE, CA 94560
 Alternative Name: BMUD
 Alternative Addr: 4300 EASTSHORE HIGHWAY
 EMERYVILLE, CA 94560
 Comment Date: 06/22/1995
 Comment: RA - Double Box Culvert completed. Construction of the new concrete double box culvert required the excavation of soils

in the area where previous investigations had indicated soils to contain elevated levels of lead and total petroleum hydrocarbons (TPHs). Theremedial actions were excavation and offsite disposal of soils with TPH above 1,000 ppm and lead above 5,000 ppm. Approximately 250 cubic yards of soil was hauled offsite. Soils with low level of TPH and lead were used as backfill material with soil cover.
 RA completed. As part of the EBMUD's North Interceptor Relocation Project, approximately 31,000 cubic yards of contaminated soil was excavated and disposed off-site. In addition 6.5 million gallons of groundwater contaminated with heavy metals was removed and treated.
 The Site was certified. All appropriate response actions were completed. No Deed Restrictions or O&M Agreement were required.

 Comment Date: 08/05/1980
 Comment: Questionnaire Received from Primal Screen.
 Facility identified from EPA Superfund list.
 Facility Drive-by (ASP): Area is paved. No apparent prob.
 Facility Type: Manufacturing vacuum systems used in semi-conductor industry.
 Waste Type: Disposal of wastes to Richmond Sanitary Land-fill. Fifteen drums at the rear of the facility leaked into

the soil. Applied Dolomite to neutralize. Since 1976, waste picked-up by Baron-Blakeslee and Class I disposal. Incident: 1967-1972 Fifteen-twenty drums of acid wastes containing heavy metals and solvent were allowed to leak into the soil.
Preliminary Assessment submitted to EPA.
Inspection (EPA FIT): E&E Report # C(86)C111; confirm DHS Preliminary Assessment information. Nine samples taken. Sample results showed PCB, PB, and NI. Recommend EPA TSCA investigation with continued DHS oversight.

Local Agency: Alameda County - Oakland, Hayward (unincorporated), Dublin, San Lorenzo, Albany, Castro valley
Case Type: Soil contamination has occurred at such low levels as to not pose a threat to water quality. One of the following sets of conditions must be met: 1.)

Initial soil contamination is less than 100 parts per million below the tank
2.) Low permeable soil (silts & clay) 3.) No shallow ground water, >50' Or
4.) Monitoring wells have been installed in appropriate locations and water analysis shows non-detect.

Local Agency:	Berkeley		

Case Type: Soil contamination has occurred at such low levels as to not pose a threat to water quality. One of the following sets of conditions must be met: 1.) Initial soil contamination is less than 100 parts per million below the tank 2.) Low permeable soil (silts & clay) 3.) No shallow ground water, >50' Or 4.) Monitoring wells have been installed in appropriate locations and water analysis shows non-detect.

 Comment Date: 05/01/1992
 Comment: The EIR for a proposed 10 story Senior Center describes the plans for the site. The waterfront site is currently a vacant parcel west of the I80 frontage Rd. on the east edge of SF Bay. (The water-gate office tower complex is just to the southwest.) The Episcopal Church will own and operate the center; The developer is BCM Partners, 60 CA St., SF 94108. Total petroleum hydrocarbons and heavy metals including lead are common to this area. (Historically this land was created from waste fill on the west and dominated by heavy industrial facilities on the east.) The site will have to be investigated and remediated before the Senior Housing center can be built. A letter from the Department to the public agency proponent outlined the Dept's PEA process.

 Comment Date: 11/01/1965
 Comment: Inspection (State): RWQCB Req -- Stop discharge of waste to on-site well.
 Questionnaire sent.
 Questionnaire received: Hauler -- IT Corp, 4574 Pacheco Bl,
 Waste Type: Plating wastes.
 RWQCB will assume lead. Awaiting cleanup of Emeryville site before taking action at Berkeley site.
 Inspection (local): Berkeley Environmental Health Dept issued request for Hazardous Materials Storage Disclosure Form. Received 03/06/87.
 Site reported for Proposition 65.
 Preliminary Assessment Done: Recommend Site Inspection (low priority) -- owner in Chapter 11 Facility has a history of numerous spills of hazardous waste to soil.
 Submit to EPA: NFA based on available information.
 Site listed on Cortese.

groundwater below a neighboring facility (Macauley Foundry, 811 Carleton, Berkeley). There is no on-site data available Chromium was found at up to 60ppm in soil and 30 ppm in groundwater at the Macauley facility. The site appears to have no exposed soil, all areas not covered by the building appear to be paved. This facility has a sister facility in Emeryville at 1401 Park St., which has soil and groundwater contaminated with chromium and TCE. A former employee of the city of Berkeley said he believed that in the past the facility disposed of wastes into the ground. The only known use of groundwater in the immediate vicinity is for industrial purposes, according to the well inventory provided the Alameda County Public Works Dept. A hazard ranking package will be prepared.

Case Type: Soil contamination has occurred at such low levels as to not pose a threat to water quality. One of the following sets of conditions must be met: 1.) Initial soil contamination is less then 100 parts per million below the tank 2.) Low permeable soil (silts & clay) 3.) No shallow ground water, >50' Or 4.) Monitoring wells have been installed in appropriate locations and water analysis shows non-detect.

Primary Substance: Gasoline
 Secondary Substance: Benzene
 Maximum Soil Concentration: 497
 Maximum Groundwater Impact: Free product in the well
 Current Benzene in Groundwater: 0
 Maximum Benzene Concentration: 0
 Nuber of Wells: Not reported
 Depth to Groundwater: 13
 MTBE Contamination Level: 0
 Interim Remediation: Yes
 Interim Remediation Date: 00/00/0000
 Lead Agency: Local Agency
 Case List: FUEL
 Enforcement Type: Not reported
 Enforcement Date: 00/00/0000
 Responsible Party Search: Not reported
 Funding: Federal

Date Status Was First Assigned - The following dates are assigned as the status progresses:

Leak Confirmed: 00/00/0000
 Workplan Submitted: 00/00/0000
 Assessment Underway: 00/00/0000
 Pollution Characterization: 00/00/0000
 Corrective Action Plan: 00/00/0000
 Enforcement Action Date: Not reported
 Remediation Underway: 00/00/0000
 Monitoring Begun: 00/00/0000
 Case Closed: 03/06/1992

Abatement: No Action Taken

Comments: URF ONLY, 37 PPM OF BENZ; CASE CLOSED 3/92!!

 Background: The site is comprised of portions of three separate properties (Barbary Coast, Shellmound Venture Properties and Powell Street Plaza) that Caltrans obtained for the widening of I-80 in Emeryville. Barbary Coast & Shellmound Ventures were formerly owned by Judson Steel and the sites are contaminated with heavy metals and petroleum hydrocarbons. The Powell Street Plaza parcels is contaminated with diesel fuel. Possible pathways (dermal, inhalation & incidental ingestion) would occur during freeway (footing) construction. The receptors most at risk are freeway construction workers. Both Caltrans & the property owners have conducted investigations of the sites. EBMUD has constructed a sewer interceptor line adjacent to the freeway. Caltrans has entered into a voluntary Cleanup Agreement with DTSC for this site.

 Comment: SITE SCREENING DONE SITE WAS VETERINARY PHARMACEUTICAL RE-SEARCH AND DEVELOPMENT FACILITY FROM MID 1940'S TO 1950'S. A SCREWORM REPELLENT WAS DEVELOPED & TESTED; IT WAS THEN BLENDED WITH A SOLVENT AND COAL TAR BASE FOR APPLICATION TO ANIMAL WOUNDS. SURFACE SOIL SAMPLES HAD CARBON TETRACHLORIDE (18 MG/KG), CHLOROFORM 994 MG/KG) AND OTHER PURGEABLE ORGANICS. ONE AREA HAD TOTAL PETROLEUM HYDROCARBON 2,000 PPM @ 30 INCHES BELOW GROUND SURFACE, AND POLYNUCLEAR AROMATICS 410 MG/KG @ 12 INCHES BELOW THE GROUND SURFACE. A GRAB WATER SAMPLE WAS ANALYZED AND DID NOT HAVE TPH. PEA MEDIUM. THE RP IS WORKING W/CITY

 Activity: CERTIFICATION
 Activity Status: VOLUNTARY CLEANUP PROGRAM
 Activity: I/SE, IORSE, FFA, FFSRA, VCA, EA
 Activity Status: VOLUNTARY CLEANUP PROGRAM
 Activity: SITE SCREENING
 Activity Status: VOLUNTARY CLEANUP PROGRAM
 Background: This site, which has been in operation since the early 1920s, is a Pacific Gas and Electric's Materials Distribution Center. The site has served as a warehouse, repair shop, and storage yard for transformers, capacitors, and other electrical supplies. A tank farm for the storage of fuel and transformer oil is also present on the site. The facility covers approximately two city blocks of an area that is generally industrialized.
 In 1995, while constructing a ramp an additional area with polychlorinated biphenyl (PCB) contamination was discovered. DTSC negotiated and signed a Voluntary Cleanup Agreement to oversee characterization of the contamination and development and implementation of a Removal Action Workplan.

 Alternative Name: G&E EMERYVILLE - MATERIALS DIST CTR
 Alternative Addr: 4525 HOLLIS STREET
 EMERYVILLE, CA 94608
 Comment Date: 01/01/1987
 Comment: This is the date the site was first listed pursuant to section 25356.
 Site Screening Done: Mitre Model required. IRM (excavation of PCB-contaminated soil) is planned.
 Records Search: Site listed in 1989 Bond Expenditure Plan. Cost Recovery complete. Final payment made by PG&E. Site was Certified in June 1989.
 PCBs above cleanup goals were detected in soil during small excavation project. Discussions with Chiron (new property owner) indicate additional excavation and offsite disposal may be necessary. Site has been decertified and removed from the historical list of certified sites.
 VCA sent to Chiron to oversee sampling and removal of PCB containing soils. DTSC will issue new certification following completion of removal action.
 RAW approved for excavation of contaminated soils above the cleanup level. Since not all soils will be removed, a deed restriction will be placed on the area where contaminants remain.
 RAW implementation begins.

Statewide Drum Recycling Program. Due to poor drum recycling practices, there have been periodic, massive releases of hazardous wastes at the site.

Contaminants include heavy metals, volatile organic compounds, semi-volatile compounds, nitrosamines, polychlorinated biphenyls (PCB), phthalates, and polynuclear aromatic hydrocarbons (PNAs). The remedial action plan was approved in June 1996. The plan called for building demolition, hot spot soil removal and capping. Groundwater monitoring will continue. Ultimately it will be folded into a groundwater management plan under development by the City of Emeryville.

The site is adjacent to Temescal creek, a tributary of San Francisco Bay. The site is 1,000 feet from a residential area, 2,500 feet from a public high school and 500 feet from a public shopping center.

Comment Date: 07/29/1985

Comment: DHS Inspection: Evidence of spillage.
Sample Results: PCBs in soil up to 100 ppm. lead up to 5250 ppm in soil.
Facility Identified: DHS/TSCD/Site Evaluation Unit inspected as part of the statewide drum recycling project. Samples taken.
Sample Results: Hydrocarbon, lead, VOC contamination in soil
Facility Drive-By: Could not see much over fence.
Preliminary Assessment Done: Poor housekeeping. Soil and possibly groundwater contamination. Enforcement case pending
This is the date the site was first listed pursuant to section 25356.
Drum recycling facility. Contaminants include heavy metals, volatile organic compounds (VOCs), semi-volatile compounds.
RA SUMPS: The RP drained 24 sumps and checked the integrity of the sumps. Completion report rec'd.
30 cubic yards of waste removed.
The Department settled with Kaiser bankruptcy for both the Emeryville and Oakland Myers Drum Sites.
FS approved proposing hot spot removal and bioremediation.
FS amended to propose hot spot removal and capping the site.
The RAP was for soil removal and capping of site.
Phase Ia Design approved to remove asbestos and demolish buildings.

EPA Waste Codes Addendum

Code	Description
D001	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
D002	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
D006	CADMIUM
D007	CHROMIUM
D008	LEAD
D009	MERCURY
D010	SELENIUM
D011	SILVER
D022	CHLOROFORM
D038	PYRIDINE
F002	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F003	THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F005	THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND

EPA Waste Codes Addendum

Code	Description
	2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
P030	CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED
P105	SODIUM AZIDE

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Elapsed ASTM days: Provides confirmation that this EDR report meets or exceeds the 90-day updating requirement of the ASTM standard.

FEDERAL ASTM RECORDS:

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

Source: EPA/NTIS

Telephone: 703-413-0223

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 08/01/97

Date Made Active at EDR: 11/28/97

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 10/01/97

Elapsed ASTM days: 58

Date of Last EDR Contact: 01/05/98

ERNS: Emergency Response Notification System

Source: EPA/NTIS

Telephone: 202-260-2342

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 09/30/97

Date Made Active at EDR: 01/02/98

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/04/97

Elapsed ASTM days: 29

Date of Last EDR Contact: 12/01/97

NPL: National Priority List

Source: EPA

Telephone: 703-603-8852

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC).

Date of Government Version: 09/25/97

Date Made Active at EDR: 11/28/97

Database Release Frequency: Semi-Annually

Date of Data Arrival at EDR: 09/26/97

Elapsed ASTM days: 63

Date of Last EDR Contact: 02/06/98

RCRIS: Resource Conservation and Recovery Information System

Source: EPA/NTIS

Telephone: 800-424-9346

Resource Conservation and Recovery Information System. RCRIS includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

Date of Government Version: 10/01/97

Date Made Active at EDR: 12/05/97

Database Release Frequency: Semi-Annually

Date of Data Arrival at EDR: 11/07/97

Elapsed ASTM days: 28

Date of Last EDR Contact: 02/10/98

CORRACTS: Corrective Action Report

Source: EPA

Telephone: 800-424-9346

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/15/97

Date Made Active at EDR: 02/02/98

Database Release Frequency: Semi-Annually

Date of Data Arrival at EDR: 01/05/98

Elapsed ASTM days: 28

Date of Last EDR Contact: 01/05/98

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

FEDERAL NON-ASTM RECORDS:

BRS: Biennial Reporting System

Source: EPA/NTIS

Telephone: 800-424-9346

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/95

Database Release Frequency: Biennially

Date of Last EDR Contact: 12/22/97

Date of Next Scheduled EDR Contact: 03/23/98

CONSENT: Superfund (CERCLA) Consent Decrees

Source: EPA Regional Offices

Telephone: Varies

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: Varies

Database Release Frequency: Varies

Date of Last EDR Contact: Varies

Date of Next Scheduled EDR Contact: N/A

FINDS: Facility Index System

Source: EPA/NTIS

Telephone: 703-908-2493

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 04/01/97

Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/23/98

Date of Next Scheduled EDR Contact: 04/06/98

HMIRS: Hazardous Materials Information Reporting System

Source: U.S. Department of Transportation

Telephone: 202-366-4526

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 12/31/96

Database Release Frequency: Annually

Date of Last EDR Contact: 01/27/98

Date of Next Scheduled EDR Contact: 04/27/98

MLTS: Material Licensing Tracking System

Source: Nuclear Regulatory Commission

Telephone: 301-415-7169

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 10/01/97

Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/12/98

Date of Next Scheduled EDR Contact: 04/13/98

NPL LIENS: Federal Superfund Liens

Source: EPA

Telephone: 205-564-4267

Federal Superfund Liens. Under the authority granted the USEPA by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner receives notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/91

Database Release Frequency: No Update Planned

Date of Last EDR Contact: 11/24/97

Date of Next Scheduled EDR Contact: 02/23/98

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

PADS: PCB Activity Database System

Source: EPA

Telephone: 202-260-3936

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 03/27/97

Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 11/17/97

Date of Next Scheduled EDR Contact: 02/16/98

RAATS: RCRA Administrative Action Tracking System

Source: EPA

Telephone: 202-564-4104

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/95

Database Release Frequency: No Update Planned

Date of Last EDR Contact: 12/15/97

Date of Next Scheduled EDR Contact: 03/16/98

ROD: Records Of Decision

Source: NTIS

Telephone: 703-416-0223

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 03/31/95

Database Release Frequency: Annually

Date of Last EDR Contact: 12/12/97

Date of Next Scheduled EDR Contact: 03/02/98

TRIS: Toxic Chemical Release Inventory System

Source: EPA/NTIS

Telephone: 202-260-1531

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/95

Database Release Frequency: Annually

Date of Last EDR Contact: 12/23/97

Date of Next Scheduled EDR Contact: 03/30/98

TSCA: Toxic Substances Control Act

Source: EPA/NTIS

Telephone: 202-260-1444

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site. USEPA has no current plan to update and/or re-issue this database.

Date of Government Version: 01/31/95

Database Release Frequency: Annually

Date of Last EDR Contact: 12/15/97

Date of Next Scheduled EDR Contact: 03/16/98

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

STATE OF CALIFORNIA ASTM RECORDS:

BEP: Bond Expenditure Plan

Source: Department of Health Services
Telephone: 916-255-2118

Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.

Date of Government Version: 01/01/89
Date Made Active at EDR: 08/02/94
Database Release Frequency: No Update Planned

Date of Data Arrival at EDR: 07/27/94
Elapsed ASTM days: 6
Date of Last EDR Contact: 05/31/94

CAL-SITES (AWP): Annual Workplan

Source: California Environmental Protection Agency
Telephone: 916-323-3400

Known Hazardous Waste Sites. California DTSC's Annual Workplan (AWP), formerly BEP, identifies known hazardous substance sites targeted for cleanup.

Date of Government Version: 11/04/97
Date Made Active at EDR: 12/20/97
Database Release Frequency: Annually

Date of Data Arrival at EDR: 11/21/97
Elapsed ASTM days: 29
Date of Last EDR Contact: 02/02/98

CAL-SITES (ASPIS): Calsites

Source: Department of Toxic Substance Control
Telephone: 916-323-3400

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database.

Date of Government Version: 10/03/97
Date Made Active at EDR: 12/05/97
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 11/07/97
Elapsed ASTM days: 28
Date of Last EDR Contact: 12/16/97

CHMIRS: California Hazardous Material Incident Report System

Source: Office of Emergency Services
Telephone: 916-464-3277

California Hazardous Material Incident Reporting System. CHMIRS contains information on reported hazardous material incidents (accidental releases or spills).

Date of Government Version: 12/31/94
Date Made Active at EDR: 04/24/95
Database Release Frequency: Annually

Date of Data Arrival at EDR: 03/13/95
Elapsed ASTM days: 42
Date of Last EDR Contact: 12/01/97

CORTESE: Cortese

Source: CAL EPA/Office of Emergency Information
Telephone: 916-327-1848

Identified Hazardous Waste and Substance Sites. The database identifies public drinking water wells with detectable levels of contamination, hazardous substance sites selected for remedial action, sites with known toxic material identified through the abandoned site assessment program, sites with USTs having a reportable release and all solid waste disposal facilities from which there is known migration.

Date of Government Version: 12/31/94
Date Made Active at EDR: 04/04/95
Database Release Frequency: Annually

Date of Data Arrival at EDR: 01/23/95
Elapsed ASTM days: 71
Date of Last EDR Contact: 01/29/98

LUST: Leaking Underground Storage Tank Information System

Source: State Water Resources Control Board
Telephone: 916-445-6532

Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state.

Date of Government Version: 10/01/97
Date Made Active at EDR: 12/23/97
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 11/25/97
Elapsed ASTM days: 28
Date of Last EDR Contact: 11/13/97

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NOTIFY 65: Proposition 65

Source: State Water Resources Control Board

Telephone: 916-657-0696

Proposition 65 Notification Records. NOTIFY 65 contains facility notifications about any release which could impact drinking water and thereby expose the public to a potential health risk.

Date of Government Version: 10/21/93

Date Made Active at EDR: 11/19/93

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 11/01/93

Elapsed ASTM days: 18

Date of Last EDR Contact: 02/05/98

SWF/LF (SWIS): Solid Waste Information System

Source: Integrated Waste Management Board

Telephone: 916-255-4035

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 2004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 09/01/97

Date Made Active at EDR: 10/31/97

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 10/01/97

Elapsed ASTM days: 30

Date of Last EDR Contact: 12/01/97

TOXIC PITS: Toxic Pits

Source: State Water Resources Control Board

Telephone: 916-227-4364

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/95

Date Made Active at EDR: 09/26/95

Database Release Frequency: No Update Planned

Date of Data Arrival at EDR: 08/30/95

Elapsed ASTM days: 27

Date of Last EDR Contact: 11/12/97

CA UST:

UST: Hazardous Substance Storage Container Database

Source: State Water Resources Control Board

Telephone: 916-227-4408

The Hazardous Substance Storage Container Database is a historical listing of UST sites. Refer to local/county source for current data.

Date of Government Version: 10/15/90

Date Made Active at EDR: 02/12/91

Database Release Frequency: No Update Planned

Date of Data Arrival at EDR: 01/25/91

Elapsed ASTM days: 18

Date of Last EDR Contact: 01/20/98

FID: Facility Inventory Database

Source: California Environmental Protection Agency

Telephone: 916-445-6532

The Facility Inventory Database (FID) contains a historical listing of active and inactive underground storage tank locations from the State Water Resource Control Board. Refer to local/county source for current data.

Date of Government Version: 10/31/94

Date Made Active at EDR: 09/29/95

Database Release Frequency: No Update Planned

Date of Data Arrival at EDR: 09/05/95

Elapsed ASTM days: 24

Date of Last EDR Contact: 12/23/97

WMUDS/SWAT: Waste Management Unit Database

Source: State Water Resources Control Board

Telephone: 916-227-4448

Waste Management Unit Database System. WMUDS is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information.

Date of Government Version: 09/20/97

Date Made Active at EDR: 11/18/97

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 10/20/97

Elapsed ASTM days: 29

Date of Last EDR Contact: 12/08/97

Source: California Environmental Protection Agency
Telephone: 916-324-1781

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

Historical and Other Database(s)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Former Manufactured Gas (Coal Gas) Sites: The existence and location of Coal Gas sites is provided exclusively to EDR by Real Property Scan, Inc. ©Copyright 1993 Real Property Scan, Inc. For a technical description of the types of hazards which may be found at such sites, contact your EDR customer service representative.

Disclaimer Provided by Real Property Scan, Inc.

The information contained in this report has predominantly been obtained from publicly available sources produced by entities other than Real Property Scan. While reasonable steps have been taken to insure the accuracy of this report, Real Property Scan does not guarantee the accuracy of this report. Any liability on the part of Real Property Scan is strictly limited to a refund of the amount paid. No claim is made for the actual existence of toxins at any site. This report does not constitute a legal opinion.

DELISTED NPL: Delisted NPL Sites

Source: EPA
Telephone: 703-603-8769

DELISTED NPL: The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

NFRAP: Comprehensive Environmental Response, Compensation, and Liability Information System

Source: EPA/NTIS
Telephone: 703-413-0223

As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

PWS: Public Water Systems

Source: EPA/Office of Drinking Water
Telephone: 202-260-2805

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water
Telephone: 202-260-2805

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SWDIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Area Radon Information: The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

Oil/Gas Pipelines/Electrical Transmission Lines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines and electrical transmission lines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

USGS Water Wells: In November 1971 the United States Geological Survey (USGS) implemented a national water resource information tracking system. This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on more than 900,000 wells, springs, and other sources of groundwater.

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1996 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in March 1997 from the U.S. Fish and Wildlife Service.

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

Water Dams: National Inventory of Dams
Source: Federal Emergency Management Agency
Telephone: 202-646-2801
WATER DAMS: National computer database of more than 74,000 dams maintained by the Federal Emergency Management Agency.

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

California Drinking Water Quality Database
Source: Department of Health Services
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.
