Mr. Reyad Katwan  
Summerhill Homes  
777 California Avenue  
Palo Alto, CA

**Ref: Summerhill Homes, 670 Olympic Avenue, Hayward, CA- 94545**

Dear Mr. Katwan:

I am in receipt of the Phase I Environmental Site Assessment, dated October 24, 1997, Initial Subsurface Environmental Site Assessment Report, dated March 9, 1998 and Additional Subsurface Environmental Assessment report, dated May 14, 1999 prepared by Terrasearch Inc., for the above referenced property.

Initial environmental investigations was conducted in February 1998, to evaluate the soil and groundwater condition around the automobile repair shop and the surficial soil condition around residential areas at the referenced property. The environmental investigation was targeted towards finding any petroleum hydrocarbons, volatile organics (automobile related contaminants), and pesticides (agricultural related contaminants). Based on the laboratory results, no significant contamination was identified.

Also, additional investigation was performed around Parcel D to determine the presence of petroleum hydrocarbon in the soil and groundwater. No significant concentrations were observed in the laboratory results.

A concrete underground storage tank was abandoned in the southeastern portion of the property under the oversight of the City of Hayward Fire Department, the lead agency for evaluating this part of the investigation.

Based upon the available information, and with the provision that the information provided to this agency was accurate and representative of site conditions, no further action is required. If you have any questions, you may reach me at (510) 567-6764.

Sincerely,

Madhulla Logan  
Hazardous Material Specialist
