Kunal,

Good to talk with you just now. As discussed, the July 22, 2011 directive letter from ACEH is the most recent correspondence from the County for the site and documents the County's thinking. As discussed, at this time all "we" have is a handwritten note that 540 mg/kg TPHd was detected; we don't even have an analytical report, let alone a tank removal report to document the environmental condition relative to the UST at the site. The very limited data makes it impossible for the County to render an opinion.

Hope this helps in your decision making.
