Hi Chris,

It appears we have several reports; please use the link below my name to access PDF files for RO0002854. The most recent report is a cleanup plan (RAP) dated Oct. 19, 2007.

Hello Mark,

Partner Engineering and Science is conducting a Phase I Environmental Site Assessment on the property adjacent to the former Dutro facility (1333 62nd Street, Emeryville). Information on GeoTracker indicates that this case remains open, and TCE was previously identified in groundwater at this site. Do you have any current information regarding the TCE contamination in groundwater and the potential sources of contamination?

Thank you,

Chris Olsen
