**Subject:** RE: Solano, toxics, 1187 Solano Ave, Albany - Well MW-2 Covered

Tony,  
Thanks for the reminder and the concern.

ACEH is in agreement with Pangea that the well is unlikely to represent a significant concern for the vertical migration of site contamination, especially in light of declining concentrations in the source area. ACEH will not require the well to be destroyed at this time; however, requests that the well be destroyed at a time in the future should it be re-discovered. The permitting agency, the Alameda County Public Works Agency, will likely do so as well. Please use this email to document our response.

Hi Mark, I've just been discussing MW-2 with a partner and tenant coming to 1181 Solano. We've spent lots of \$\$ and tenant will start spending another \$500+ K on that space, so we'd of course like something reliable from ACEH responding to Bob's letter about MW-2. If there would be lingering liability, for contractor or for us, because that well might still be down there, we'll want to dig and show you ASAP, by end of this month at latest. It would be expensive of course, but Not Nearly as bad as having to go dig after restaurant opens . . . Please get us ACEH response re MW-2 within the next week please. Thanks! Tony

Btw – thanks also for expediting letters to neighbors re our sampling, being done today, and all seems to be going fine.

Mark,

How is the letter coming regarding requested sampling at 848 Stannage?

Here is our letter about lost well MW-2 per Dilan's request.
