Paresh: I would like to close the three MWs in place by pressure grouting. Mr. Wyman Hong at Zone 7 advised that this is acceptable to him; however, he requests that written approval from ACEH would be provided prior to his approval of the well permits. I believe an email will be acceptable. Since there were three quarters of groundwater sampling with no reportable concentrations of TPH or VOCs, the wells are shallow wells, and the release is quite dated, I believe that this is a favorable site for in place closure. Please let me know if you approve this procedure so that I can prepare the scope of work for Safeway's approval to proceed. Thank you.

Hello Don,

The well destruction request letter was sent to the RP on July 22, 2010. I believe you were also courtesy copied.

Sincerely,

Paresh: I just returned from the BP Oil Cleanup and want to know if you sent out a request to close wells letter for the above case. I would like to get this case closed for Safeway. Thanks.

Hello Don,

We have recently received case closure concurrence from the Regional Board. A letter requesting monitoring well destruction will be sent by the end of next week.

Sincerely,

Status of Fuel Leak Case No. RO0002860

Paresh: I last spoke with you regarding the Former Quest Laboratory site investigation on February 4, 2010. At that time you indicated that you would review the case records and see if we were at a point where you would grant case closure. Four quarters of groundwater monitoring have been completed with very favorable results that support no further action. The client recently requested to know the status of this case. Please advise the current status as no additional monitoring is being conducted pending your review. Please contact me at your earliest convenience. Thank you.
