Hamid Saebfar, Chief DTSC Schools Unit, 818-551-2876

inform him of PCE detections in indoor air samples at Montessori school. RP did only indoor air sampling component of work at site. Unable to interpret results without the additional work that was required. Additional soil & water sampling & subslab sampling has been requested/approved in last directive.

Informing him of site since it is a school. Do they take oversight, provide joint oversight, or case remain with us?

He thanked me for informing him of site. Options for regulatory oversight are open, all of the above possible. He will be following up with me re: this issue.

He will have a toxicologist call me to discuss results & evaluate whether school is okay for occupancy based on results.

HVAC system ioperation needs to be evaluated, by running system 24 hrs acn control any potential vapor issues. Consultant needs to evaluate HVAC system.

Bruce Burrows, 925-788-5213,

He left msg

He received my voice mail, he was talking to Peter McIntyre who called him after he hung up with me.

He understands meeting is scheduled for tomprrow at 2p he will be there

school has been notified, gave her (school administrator) copies of air sampling report

They are dilligently looking into.

Gabriel Chu, owner, also spoke to school

intentions are to give go ahead to AEI to implement WP & go to remediation.
