**Subject:** RE: CPL Sunol, CA Site

Joe,

For clarification, ACEH is not requesting sampling of the monitoring wells 12 through 15 along Calaveras Road since current groundwater conditions are unlikely to have changed from previous dry conditions. The current letter does not include a request for groundwater monitoring. If conditions change, ACEH could request sampling of the wells along Calaveras Road.

Jerry, thanks of the clarification on your letter on the subject site dated September 11, 2014. Specifically the item we discussed was in the second paragraph on the first page relating to groundwater monitoring wells 12-15 along Calaveras Road. You clarified that the wells do not need to be sampled and the letter does not require future quarterly groundwater monitoring reporting.

URS agrees with this clarification, and just wanted to make sure we had a common understanding.

URS will work with the SFPUC to address the other concerns raised in your letter.

Thanks again, Joe.
