Subject: SLIC Case No. RO0002892, Chevron Sunol Pipeline, 2793 Calaveras Rd, Sunol, CA
March 2008 Update – SVE System Schedule

Dear Mr. Wickham:

URS on behalf of Chevron Pipeline Company (CPL) is updating Alameda County Environmental Health (ACEH) regarding the restarting of a Soil Vapor Extraction (SVE) System at the CPL site near Sunol, California.

Summary of Activities, February 1, 2008 through March 14, 2008

URS and CPL have conducted the following in order to facilitate site activities:

- URS has contacted Pacific Gas and Electric (PG&E) and requested an electrical power hook-up in order to operate an SVE System. PG&E is currently reviewing the project needs in order to determine if and when a power hook-up can be completed.
- URS has discussed the possibility of acquiring electrical power from Valley Crest Tree Company (VCTC) in order to operate an SVE System. VCTC is amenable to the proposal and is awaiting CPLs decision. URS will have an electrical contractor evaluate the feasibility and cost as our next step.
- CPL has begun discussions with the land owner, San Francisco Public Utilities Commission (SFPUC), to remove the trees currently preventing site activities such as well abandonment and restarting of an SVE System.

URS will update ACEH again by April 15, 2008 with the developments of the above mentioned items and any other significant information pertaining to the restarting of an SVE System.

If you have questions, please do not hesitate to contact me at (510) 874-3201.

Sincerely,

URS CORPORATION

Joe Morgan
Project Manager
