

June 30, 2016 Site visit

RO2896 1396 Fifth Street; Oakland, CA 94607

Site visit to observe field work on June 30, 2016; 9:15 am to 10:45 am

Met with Jay Scheider PG and Mark Drollinger of Citadel Environmental Services, Inc.

Observed soil boring advancement with push drilling rig; continuous core collection; and PID readings by Jay Scheider and assistant.

Discussion with Mark Drollinger regarding groundwater sampling near former UST #4 area. Mark stated that access to proposed sampling location using drill rig would block traffic due to the former tank location being next to intersection. ACDEH agreed to sampling groundwater immediately north of former tank area.

Drill rig broke down around 10:30 am and could be repaired on site. The estimated time of arrival of a new rig was 12:30 pm
