Jeff,

I have reviewed the proposal to install the two sets of wells. The proposed well installation is acceptable as proposed. I will send out a directive letter next week that includes due dates for reports on the well installation and sampling. The directive letter will also identify some items that have come up during my case review.

Subject: Jordan Ranch, Dublin

Good afternoon, Dilan:

We have completed our field investigations at Jordan Ranch in Dublin. Please see attached a compilation of our recently collected data. This includes a tabular summary of the recently collected samples as well as historic data for soil,

groundwater and soil gas, a site figure depicting concentration summaries at sampled locations for COCs, boring logs, and proposed well details. Based on the results, we propose to put in 2 sets of wells (2 wells) each, depicted as MW-6A and 6B and MW-7A and 7B, respectively. MW-6A and MW-7A will each extend to a depth of 19 feet bgs and screened from 9 to 19 feet bgs; while MW-6B and MW-7B will each extend to a depth of 30 feet bgs and screened from 20 to 30 feet bgs.

Please let me know if you have any questions or comments; we look forward to receiving a go-ahead so we can install the wells as soon as possible. Right now we are tentatively scheduled to install the wells beginning October 23.

Thank you,
Jeff
