SOIL REMOVAL WORKPLAN

Reference: ACEH, Technical Comments, Jordan Ranch, Dublin, California, June 17, 2013.

Dear Mr. Wickham:

This workplan was prepared in response to Technical Comment No. 1 in the referenced correspondence. The purpose of the workplan is to remove soil impacts that have been identified in surface soil to ensure that there are no human health concerns prior to development of the site to residential use.

BACKGROUND

The locations of the surface soil samples that were collected in August 2013 are shown on Figure 2. The soil sample locations were selected to address potential polychlorinated biphenyl (PCB) impacts previously observed at the base of a former power pole and petroleum staining previously observed near a former barn and above-ground storage areas. The coordinates of the former structures were obtained from Google Earth to aid in selecting the sample locations. The soil samples were collected at depth intervals of 0 to 6 and 12 to 18 inches below ground surface.

Three of the eleven soil samples were submitted for analysis of PCBs by EPA Test Method 8082. Eight of the eleven soil samples were submitted for analysis of total petroleum hydrocarbons as gasoline (TPHg) and volatile organic compounds by EPA Test Method 8260B, motor oil, and diesel by EPA Test Method 8015B, silica gel cleanup by EPA Test Method 3630, and organochlorine pesticides by EPA Test Method 8081.

PCBs were not detected above the laboratory reporting limit of 0.05 mg/kg. Relatively low concentrations of diesel were detected in seven samples up to a maximum of 58 mg/kg. Motor oil was detected in five samples up to a maximum of 550 mg/kg. Trace concentrations of 4,4-DDD, 4,4-DDE, and alpha-chlordane were detected in one sample. The only detection that exceeded Table A ESLs was a detection of toxaphene at location Barn SS-7 at a depth of 0 to 6 inches. The detected toxaphene concentration, 3.6 mg/kg, is less than the TTLC. Diesel and motor oil detections were also collocated at Barn SS-7, at 63 and 230 mg/kg. Cumulative analytical data is tabulated in Table 1.

PROPOSED REMOVAL ACTION

We propose to remove the elevated toxaphene detected at location Barn SS -7. The proposed removal action will involve excavation of the impacted surface soil and landfill disposal. The removal action scope entails the following:

- We will retain a hazmat licensed backhoe subcontractor to perform the soil excavation and landfill disposal. We estimate that 12 tons of Class II soil will be excavated from a 10- by 10-foot excavation centered on location Barn SS-7. The excavation will extend to a depth of 2 feet. The soil will be temporarily stockpiled onsite for approximately two weeks pending landfill acceptance. We will collect one 4-point composite sample from the stockpile for landfill profiling purposes. The stockpile sample will be analyzed for total petroleum hydrocarbons as diesel and motor oil by EPA Test Method 8015B, silica gel cleanup by EPA Test Method 3630, and organochlorine pesticides by EPA Test Method 8081.
- We will collect four confirmation sidewall samples and one base sample from the excavation. The stockpile sample will be analyzed for total petroleum hydrocarbons as diesel and motor oil by EPA Test Method 8015B, silica gel cleanup by EPA Test Method 3630, and organochlorine pesticides by EPA Test Method 8081. Samples will be collected in driven liners with hand equipment.
- We will prepare a removal action completion report for submittal to ACEH. The report will document the confirmation sampling, soil excavation, and landfill disposal. The locations of the confirmation samples and excavation will be documented on a site plan. Landfill disposal manifests and receipts will be attached to the report.

SCHEDULE

We can perform the excavation and confirmation sampling within two weeks of receiving ACEH approval on the workplan. We estimate that the soil off haul would be performed approximately two weeks after the confirmation sample data is collected.

If you have any questions on any portion of this workplan, please call and we will be glad to discuss them with you.

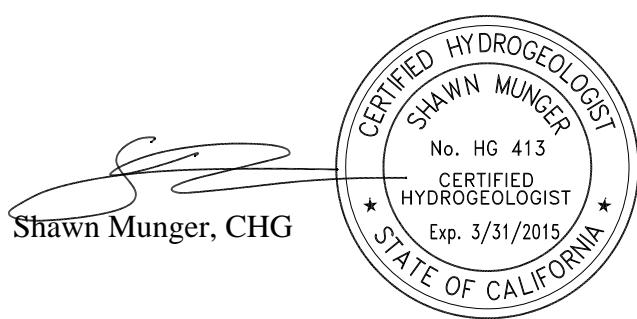

Sincerely,

ENGEO Incorporated
