Jim Lehrman of Kleinfelder called on 4/3/2008. City of Pleasanton has authorized work at Fire Stations 1 and 3. Work is ongoing; collected soil samples at 15, 20, 25 and 30 feet bgs. Expected water below 50 feet but encountered water at about 25 feet bgs. He recommended not analyzing the soil sample below the water table. Should they analyze soil sample below water table? 925-484-1700 ext 204. I called back to indicate it was acceptable as recommended to not analyze the upper three soil samples.
