**Subject:** Re: RO 2931 workplan addendum status

I understand. I did not want to undergo an extensive off site investigation until we better understood what was going on at the site.

I can prepare an brief addendum addressing the offsite work with a transect of borings along East 11th Street. Brief, one page, one figure. If it meets your requirements could we get approval in time to complete the work in June?

The RP does want to move this project forward.

Thanks,  
Mike

And I really want a transect of offsite borings. I feel that if you don't do that now, it will never get done, as the RP seems to only want to do work when it affects his planned project timeline. I hate to reject this work plan again but I feel a better offsite investigation needs to be performed. One boring will not tell us anything, especially if you don't even know the gw gradient.

Hi Barbara,

Just checking again on the status of the workplan addendum for Shore Acres Gas (RO 2931). The client is really anxious to get the wells installed and complete the five day test before the year end expires on June 30, and the budget restrictions are in place. Next years budget could then be used to install a system.

Thanks,

Mike
