Hello Drew:

The last documented groundwater monitoring event was on September 29, 2015; was there a sampling event at the end of December 2015? If that is so, I would say that 6 months is an adequate time period to start to see rebound. I will give you a report extension as shown below, but if reports are going to be late, I request that you e-mail an extension request before the report is late.

Please upload to Geotracker the boring logs for EW-3, EW-4, and SB-9 through SB-21 in addition to the Geo_XY and Geo_Z coordinates for all of the site's monitoring wells (MW-1 through MW-6, EW-1 through EW-4).

TECHNICAL REPORT REQUEST

- Please upload technical reports to the ACEH ftp site (Attention: Karel Detterman), and to the State Water Resources Control Board's Geotracker website, in accordance with the following specified file naming convention and schedule:

· **July 30, 2016 ~~March 18, 2016~~** – Geotracker Confirmation submittal of monitoring well survey data

File to be named: RO2931_MISC_R_YYYY-mm-dd

· **July 30, 2016 ~~March 18, 2016~~** – Miscellaneous Report

File to be named: RO2931_MISC_R_YYYY-mm-dd

· **July 30, 2016 ~~March 18, 2016~~ (Submit Only to ACEH and ACPWA)** – DWR Form 188 for Six Groundwater Monitoring and Four Extraction Wells

· **August 19, 2016 ~~April 18, 2016~~** – Interim Remediation and Soil Vapor Investigation Work Plan

File to be named: RO2931_IR_WP_R_YYYY-mm-dd

These reports are being requested pursuant to California Health and Safety Code Section 25296.10. 23 CCR Sections 2652 through 2654, and 2721 through 2728 outline the responsibilities of a responsible party in response to an unauthorized release from a petroleum UST system, and require your compliance with this request.

Thank you for your cooperation. Should you have any questions or concerns regarding this correspondence or your case, please send me an e-mail message at karel.detterman@acgov.org or call me at (510) 567-6708.

Karel,

We shut the unit down 4/11/16 due to declining vapor influent concentrations so we could schedule the unit change from thermal to catalytic mode. After reviewing data, we decided to keep the unit down until the 4q15 remediation system evaluation report was completed and reviewed by your office.

Unfortunately, we are very late with that report, but it should be completed and to you very soon. In the mean time, the unit has been down for 2 months. Is that long enough to perform the rebound sampling event we discussed? Thanks.
